tree to be removed - see below*

TREE PROTECTION

tree protection fence to BS5837:2012

See Arboricultural Method Statement for 'A628 Dodworth Road/Broadway Junction Improvement' dated August 2019 for details specific to construction of gabion wall, acoustic fence and ground stabilisation works.

Fencing

Barrier as specified in BS5837:2012 to be erected before works starts on site, and to be kept in a good and effective condition for the duration of the works until the works are complete on site. Fence to be outside canopy of all trees to be retained, around the RPA as shown on the drawing. There will be no need for the fence to be opened up during the works.

Storage

Storage of material is never to occur within the RPA. Similarly, any transfer of materials harmful to plant growth is not to occur uphill of trees, to avoid risk of spilled material falling downhill into RPA.

Fires

No fires should be lit where they might cause damage to trees. Particular note of wind direction is to be made.

Construction Works

Any construction works within the RPA is to be carried out carefully, minimising disruption to tree roots, and with an arboriculturist present.

BARRIERS

maintenance access pooint

Acoustic fence, timber, 3m high

Acoustic wall, gabions, either 1m high or 1.5m high

PATHS AND PAVING

1.8m aNd 1.2m wide Flexipave paths in linear park

3m wide Flexistone path in central area

route for fairground vehicles with reinforced cross over path

see Drg No PPP/557/04 for details

see Drg No PPP/557/04 for details

FURNITURE AND EQUIPMENT

Friends of Penny Pie Park container cafe

Bird and bat boxes to be installed with assistance of Friends of Penny Pie Park

500m
