Once the working area is made safe with herras fencing and the public footpath is barriered off the works will start with the removal off shrubs bushes and soils to create the safe space needed for new path and steps, the soil will be removed down to a solid base then will be stoned up with 6f2 then type 1. Then a pin kerb edging will be layed on concrete to create the path top and bottom, because of the gradient there will be a step construction joining the two paths, these will be block steps built on individual footings for stability, each step will then be filled with a compacted type 1 then we will lay a slabs to finish off the steps each with a non slip strip. At the top and bottom we will install tack tiles to spec and the paths will be finished off with tarmac. Top soil will be needed to finish off and make neat after the works are complete, most of the works can be carried out from the car park side keeping minimal interruption on the public highway side.
