

SEMI VERTICAL AMAZON ECO CYCLE SHELTER

Compact, Customisable, and Designed for Sustainable Spaces

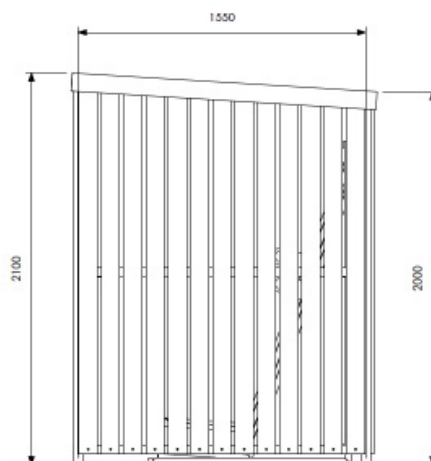

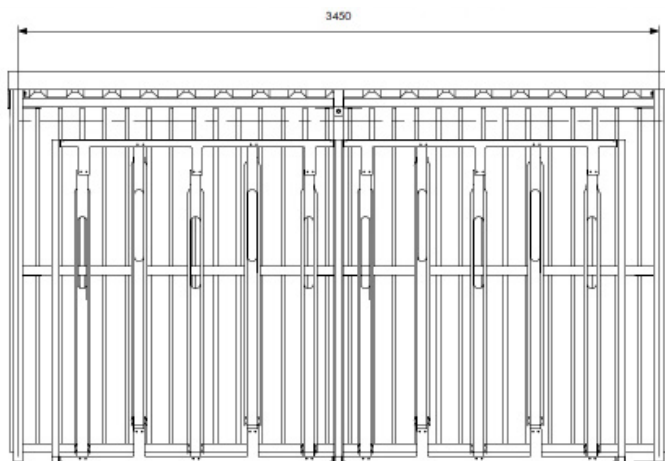

Maximise space without compromising on style, security or sustainability. The Semi Vertical Amazon Eco Shelter is an innovative, space-saving solution for secure bike storage, ideal for residential, commercial, and education projects where footprint is limited but demand is high. By storing bikes semi-vertically at a 45-degree angle, this shelter significantly reduces depth requirements while comfortably housing 6 to 14 cycles. Each shelter is clad in FSC-certified timber, with customisation options to match your project's aesthetic and sustainability goals. Built in Britain, this shelter combines robust galvanised steel with the warmth of timber finishes, delivering a durable, BREEAM-compliant shelter that enhances any development. Available in 6, 8, 10, 12 or 14-bike configurations, the shelter includes hot-dipped galvanised steel racks and a mild steel frame to BS EN ISO 1461:2022 standards.

- › **Space-Saving Semi Vertical Racks:** Store bikes efficiently at a 45 angle, reducing depth without sacrificing capacity.
- › **FSC-Certified Timber Cladding:** Choose from hard or softwood finishes to suit your environment and sustainability standards.
- › **Flexible Locking Options:** Includes locking hoops with additional gate, padlock, and access control upgrades available.
- › **Rear Panels Include as Standard:** For extra weather protection and visual continuity.
- › **Optional Sedum Roof:** Add a green, biodiverse roof to support BREEAM targets.
- › **Fire-Resistant Upgrade Available:** Where additional compliance is required.
- › **Power Coated Finishes Available:** Match any RAL colour scheme.
- › **Made in Britain:** With a 10-year warranty

	Standard Minimum Width	Standard Minimum Depth	Standard Minimum Height
6 Space	2225mm	1600mm	2100mm
8 Space	2835mm	1600mm	2100mm
10 Space	3445mm	1600mm	2100mm
12 Space	4055mm	1600mm	2100mm
14 Space	4665mm	1600mm	2100mm

SEMI VERTICAL AMAZON ECO SHELTER

A compact, space-saving bike storage solution clad in FSC-certified timber. This Semi Vertical Shelter reduces footprint while storing up to 14 bikes securely. Ideal for developments with limited space, it features galvanised steel construction, BREEAM-compliant options and a 10-year warranty.

Customisation that Works for You

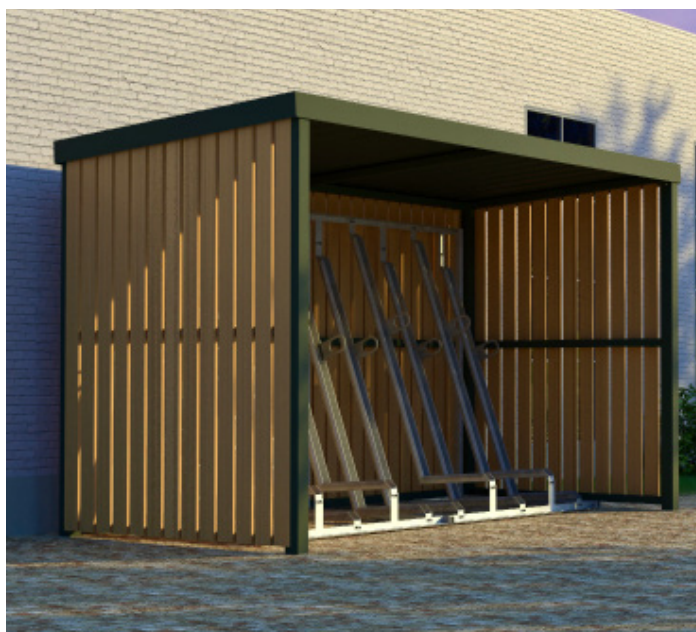

Every site is different which is why this shelter is built to adapt:

- › Choose from 6, 8, 10, 12, or 14-space units, or request bespoke dimensions for larger cycle storage options.
- › Hot-dipped galvanised to BS EN ISO 1461:2022 frame finish
- › Multiple gate options with optional sedum green roofing upgrades
- › Optional polyester powder-coating available
- › BREEAM compliant & Made in Britain

PROJECT

Bourne Business Park

We were presented with the unique challenge of designing and constructing a bespoke cycle shelter at Bourne Business Park in Weybridge. The client wanted to maximise space efficiency without compromising durability and aesthetic appeal. Our team collaborated closely with the client to conceptualise and bring to life the Semi Vertical Amazon Eco Cycle Shelter, a pioneering cycle storage solution tailored to their specific requirements. This tailored shelter featured: Hot-dipped galvanised frame for robustness and longevity, FSC-certified clear sealed and planned softwood battens for an eco-friendly finish, and sedum green roofing for added environmental benefits.

Innovative, eco conscious sedum green roofing added a touch of green luxury to the bespoke storage shelter. By integrating a living roof, we enhanced aesthetic appeal and contributed to environmental sustainability. Sedum roofing offers numerous benefits, including storm water absorption, carbon sequestration, and habitat creation for urban wildlife. As part of our commitment to green architecture, we offer sedum roofing options to complement our bespoke storage solutions, ensuring that every project employs the perfect blend of functionality and eco-friendliness.
