Dear Sirs

Re: Grimethorpe – South Kirkby 66kV Overhead Line Rebuild
Electricity Act 1989

Please note that Northern Powergrid (NPg) are proposing to rebuild the above 66kV overhead line (OHL). The existing wooden poles and steel structures (Woodhouse Masts – WHM's) along the route of the OHL have been in situ for some time and need to be replaced due to their age and condition.

In this regard please find enclosed 3 copies of an exemption notice in accordance with the exemption regulations of April 2009. If your Authority has no objections to the proposed works then I would be obliged if you could complete all copies of the aforementioned notices and return two copies to me within 6 weeks.

As the route of the OHL crosses into Wakefield Metropolitan District Council territory I have sent them a similar notice.

Thank you and if you require any further information at this stage then please call me on 07568 112287.

Yours faithfully

[redacted]
