Dear Nick,

Property Extension Works at Line View.

Thank you for contacting Network Rail with regards to your property extension works.

I have no objections to your works being undertaken as long as the following points are covered in method statements and risk assessments provided by your building contractor: -

- Orange PPE mini vests are worn by all contractors working in view of the trains.
- The works are to the North Face of the property.
- No MEWPS, Cherry Pickers, Cranes will be used for the works.
- All scaffold has been designed by a competent person, with an assessment of the loadings at ground level to avoid risk of collapse.
- There are no works being undertaken on Network Rail property.
- The boundary between your property and Network Rail property is to remain intact.
- There are no drainage connections onto Network Rail property.
- Materials and equipment are not propped up against the boundary fence / wall.
- In an emergency situation only, to get trains stopped, Barnsley Signal Box should be contacted on 01226 730808 where you must describe your location of work as between Silkstone Common and Dodworth Station and describe the issue.

A copy of this letter should be held on site and included within method statements.

Network Rail may audit the site if a Construction Manager is in the area.

Please come back to me if you require clarification or the above points cannot be met.

Kind Regards,

[redacted]
