Dear James

Re. South Yorkshire Group Data Centre

Further to your e-mail enclosing comments from your Engineers' Department I comment as follows:

1 Please see enclosed 4 copies of the amended plan 13 193 PA 020 rev A showing an amended footpath arrangement with 3m radius kerb line and additional notes

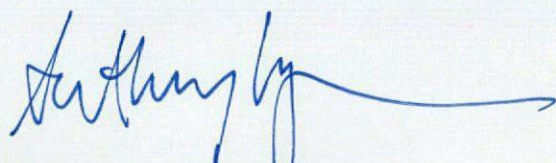

2 regarding the visibility splays we believe the existing arrangement as shown on the above drawing provides for these

3 With regard to parking, I can reconfirm that the entrance will be used only as a contingency entrance in the event of a major incident at the Main Security Lodge. Depending on the nature of the incident the period of use may vary but in any event, under such circumstances, the numbers attending the Data Centre will be considerably reduced to contingency staff only so the parking requirement will also reduce. Further, the proposals affect only the Overspill Car Park, which again, is rarely filled to capacity. There will be one known period of approximately 8 – 10 weeks (exact period tbc) when the Secondary Entrance will be used in order to facilitate the proposed upgrade works at the existing Security Lodge but this will be pre-planned with an appropriate management strategy in place

4 For the control of parking opposite the entrance it is proposed that appropriate restrictions are put in place with the extent of double yellow lining and signage to be agreed with the Highway Authority following Planning

I look forward to receiving any further comments from your Engineers' Department

Yours sincerely
