Dear BMBC,

RE: Discharge of condition 3 of application 2025/0461: Installation of a 5m Galvanised Sculpture, on a 1m foundation

Thank you for submitting an application for the discharge of condition 3 (CMS) of application 2025/0461.

We confirm that the information provided was satisfactory and the following conditions are discharged in FULL:

CONDITION 3 – DISCHARGED IN FULL

Prior to the commencement of development, a Construction Method Statement shall be submitted to, and approved in writing by, the Local Planning Authority. The Statement shall provide for (but not exclusively):

- Site working hours and delivery hours which should avoid peak hours;
- The parking of vehicles of site operatives and visitors;
- Any temporary access to the site;
- Loading and unloading of plant and materials;
- Storage of plant and materials used in constructing the development;
- Arrangements to receive abnormal loads or unusually large vehicles;
- Methods of communicating the Construction Management Plan to the workforce, visitors and neighbouring residents and businesses;
- Measures to prevent mud/debris being deposited on the public highway.

Once agreed, the approved Statement shall be adhered to throughout the construction period.

Reason: To ensure that satisfactory access arrangements are provided, in the interests of highway safety and in accordance with Local Plan Policy T4: New development and Transport Safety.

The submitted Construction Method Statement has been reviewed by the Highways DC Officer. The statement satisfies the requirements of the above condition with sufficient detail provided to allow the condition to be discharged. The condition is therefore discharged in full.
