7 Identification Of Tree(s) And Description Of Works

Please identify the tree(s) and provide a full and clear specification of the works you want to carry out Continue on a separate sheet if necessary You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work Where trees are protected by a TPO please number them as shown in the First Schedule to the TPO where this is available Use the same numbers on your sketch plan (see guidance notes)

Please provide the following information below tree species (and the number used on the sketch plan) and description of works Where trees are protected by a TPO you must also provide reasons for the work and where trees are being felled please give your proposals for planting replacement trees (including quantity species position and size) or reasons for not wanting to replant

E g Oak (T3) fell because of excessive shading and low amenity value Replant with 1 standard ash in the same place

The beech, Fagus sylvatica, is located at the front of the property and is clearly illustrated in Photograph 1 (appendices)

I advocate a simple crown lift with no pruning wound exceeding 15-cms diameter No branch above 40% of the height of the tree will be removed in keeping with good tree pruning practice for crown lifting
