

**BARRETT EXCAVATION LTD
YARD AT WEST ROAD BARNSELEY
PROPOSED REGRADING OF SITE
AT RELOCATION OF EXISTING WORKSHOP**

The existing site is sited in the area of an old tip and trial holes indicate that the tipped material is predominately ash.

It is proposed to excavate down to the original ground levels within the tipped area and remove the ash from site.

Imported fill will then be placed and engineered to achieve a suitable gradient to form a compacted surface for any proposed future development.

The existing workshop will be resited within the existing site boundary.

The following plans show the proposed details :-

PLAN 1 Site Location Plan

PLAN WESTRD/APR08

EXISTING LEVEL SURVEY

PLAN WESTRD/PROP/WORKSHOP/JUL08 PROPOSED LEVELS AND
AND RELOCATED WORKSHOP

PLAN WESTRD/XSECT

CROSS SECTION .

The full site area within the red boundary line is 3802 Square Metres
