Supporting Statement

Greenworks would like to draw the planning department's attention to the success of the service. We were recently featured in the Barnsley Chronicle Business and Industry supplement highlighting our success!

Greenworks has also been inundated with requests by both volunteers and potential trainees to access the service since our recent improvements (Welfare Unit). Greenworks would also like to highlight the fact that through our work we have been able to employ one of our young volunteers who is from Barnsley and who was long term unemployed (we would like to continue this trend).

Greenworks would like at least to be able to facilitate a few more workers safely by increasing the Welfare facility to what Greenworks feels is a minimal extension to the current unit considering the impact Greenworks has on a number of young jobless people in the Barnsley Borough!

We feel that the extension will have none or minimal impact to the site.

Please note :

The window on the extension is lower than those on the existing building.

Specific Wheelchair Housing Design standards

– Fixtures and Fittings

•Window glazing in main habitable rooms should begin at 800mm from floor level or lower to allow wheelchair users to see out.

Taken from The Department for Social Development

This is to allow wheelchair users to view the environment outside.

* Please note an additional 2 acres have been purchased and added to the size of the land.
