

The government (our prime minister) have today said new homes WILL NOT be built on green fields. This land is green belt land and it is green belt for a reason and should not be built upon. Please see <https://www.telegraph.co.uk/politics/2021/10/06/boris-johnson-pledges-no-homes-green-fields/> The area surrounding this development is already under immense stress from road traffic. Barugh Green (huddersfield road) towards Darton already suffers terrible traffic especially around peak times with traffic regularly extending from the roundabout at The Royal public house back to the roundabout at Claycliffe Road. What is another 1700 homes with potentially 2 cars per home going to do for the area especially as the new road will be funnelling even more traffic down this route?
