

PLANNING CONSULTATION RESPONSE

Application No	2025/0830
Proposal	Erection of sub-station
Address	418 Carlton Road, Carlton, Barnsley, S71 3HX
Date of Consultation Reply	15/01/26
Consultee	Highways DC

Consultation Assessment and Justification

The application proposes to erect a sub-station within the large glass-recycling facility some distance from the site access onto Carlton Road. Amended drawings have been submitted relocation the sub-station within the site; however, this does not impact on highway safety, and the previous comments still stand. These are copied below:

The site benefits from a large area of hardstanding with adequate car parking and a turning area for HGVs within the site. The proposal has no impact upon this or staff numbers. As such, once built, the scheme will have little impact in terms of highway development control.

The scheme is acceptable to HDC officers, and no specific conditions are deemed necessary.
