DESIGN & ACCESS STATEMENT

Proposed liquid slurry storage lagoon at Gunthwaite Lane, Upper Denby for P Holmes & Son, Delph House Farm, High Flatts, Denby Dale, Huddersfield, HD8 8XY

The lagoon is to be constructed by means of pre cast concrete Rockwall storage walls in 1m sections with a reinforced concrete floor. The lagoon is to serve a dairy farm which lies within a designated NVZ (nitrate vunerable zone) so must comply with new environmental regulations which require adequate storage of slurry for five months from October to February inclusive and preferably six months in case weather conditions prevent spreading slurry on the land in early spring.

Access

Vehicular access is via Gunthwaite Lane which runs parallel to the slurry lagoon.
