- Appendix B - Proposed Layout Plans
- Appendix C - *Bus Services Information*
- Appendix D - Traffic Count Data

1.0 Introduction

1.1 MJM Consulting Engineers Ltd have been appointed by Morgan Ashurst to provide a Transport Statement in support of the proposals to build a 841 sq m Joint Services Centre (JSC) on land currently occupied by Barnsley MBC offices that are accessed off Churchfield Lane in Darton near Barnsley to provide combined healthcare and council services, as shown on plans in Appendix A and B.

1.2 The proposed JSC will be occupied by Barnsley PCT and Barnsley MBC.

Services provided by Barnsley PCT are as follows:-

- District Nurses
- School Nurses
- Health Visitors
- Midwife Service

Services provided by Barnsley MBC are as follows:-

- Barnsley Connect
- Childrens Centre
- Social Services

1.3 Early consultations were sought with the Planning and Highway Authority to agree the scope of the information required to support the application. See Section 2.0.

1.4 To provide a clear understanding of the existing and proposed traffic and pedestrian movements local to the proposed development access, a survey was undertaken on the 13th March 2009 between the periods of 0730 – 0930 and 1500 – 1900.

2.0 Scope of the Study

2.1 Discussions with the Development Control officers at Barnsley Metropolitan Borough Council (BMBC) indicated that the following issues need to be assessed in a Transport Statement to accompany the planning application for the proposed development:-

- Existing traffic movements
- Proposed traffic movements and distribution
- Car Park access
- Traffic Regulation Orders
- Car parking levels
- Churchfield Lane/Huddersfield Road junction layout
- Pedestrian access from Churchfield Lane
- Pedestrian signage from Church Street
- Refuse collections
- Cycle Parking

2.2 It was agreed that capacity assessment of the junction of Huddersfield Road and Churchfield Lane were not necessary at the initial stage but may be required dependent on the levels of the existing and predicted traffic flows.

2.3 There is also a requirement to provide a Travel Plan Framework and this is to be submitted as a separate document with the planning application.

3.0 The Site, Proposed Development and Existing Transport Infrastructure

3.1 Site Location

- 3.1.1 The location of the site in relation to the local transport network and nearby residential areas of Darton is as shown in Appendix A. It is currently occupied by Barnsley MBC offices.
- 3.1.2 The proposed location for the development is central to the patient catchment area of Darton.
- 3.1.3 The existing site is accessed via Churchfield Lane in close proximity to the Churchfield Lane/Huddersfield Road junction which is adopted and maintained by the Highway Authority. It is proposed to close off this access from the old Huddersfield Road stub. Churchfield Lane is 7.5m wide and the Huddersfield Road stub is 6m wide, both are subject to a 30mph speed limit and road lighting is provided.
- 3.1.4 On both sides of the Huddersfield Road stub and Churchfield Lane surfaced footways are provided and these link to footways on Huddersfield Road.
- 3.1.5 Access to the Huddersfield Road stub from the local highway network is via Huddersfield Road which is subject to a 30 mph speed limit. The visibility splays to the left and right exceed the minimum requirements of 2.4m x 90m however the visibility splay is obscured at times by vehicles parking in the deceleration and acceleration tapers within the junction.
- 3.1.6 On street parking is allowed outside the residential properties adjacent the site but waiting restrictions are in place on Huddersfield Road to the south east of the site.
- 3.1.7 There is a shared cycleway/footway along the Northern side of Huddersfield Road, this terminates at the end of the vehicle layby just prior to the junction with Church Street.

3.2 *Description of the Proposed Development*

- 3.2.1 The proposed development is for a Joint Services Centre of 841sq m GFA which will provide secondary health care services provided by Barnsley PCT that will operate from 0800 to 1900 Monday to Friday, alongside the Barnsley MBC social services, children's centre and Barnsley Connect facility.
- 3.2.2 The services provided by Barnsley PCT will include the following:
- District nursing
 - School nursing
 - Health visiting
 - Midwives
- 3.2.3 The proposal is to provide 30 parking spaces for staff and visitors with 2 of the spaces being allocated for disabled parking.
- 3.2.4 Visibility splays for the patient car park access at its junction with the Huddersfield Road stub are in excess of 2.4m x 70m.
- 3.2.5 It is proposed to close the existing access onto Churchfield Lane for vehicles and undertake works to link up the footways on either side of the access.
- 3.2.6 Works within the adopted highway will be required to form the proposed car park entrance.
- 3.2.7 Secure cycle parking areas are to be provided for both visitors and staff sufficient for 5 cycles as indicated on the Architect's site layout plan in Appendix B.

3.2.8 A secure bin store is located within the fully enclosed staff parking area. Refuse vehicles will enter the site in forward gear via the proposed car park entrance and manoeuvre within the car park as demonstrated on the autotrack swept path diagrams for a 3 axle refuse in Appendix B.

3.3 *Existing Transport Infrastructure*

3.3.1 A number of bus services operate on Huddersfield Road and Churchfield Lane and 3 bus stops with shelters are within 100m of the entrance of the JSC on Huddersfield Road and Churchfield Lane adjacent to the site and 2 other stops are also within 500m walking distance from the entrance of the proposed JSC. The schedule of services is as summarised in Table 3.3 and the bus stop locations are as indicated in Figure 1.

Service No.	Route	Operator
95	Barnsley – Skelmanthorpe - Denby Dale	Stagecoach
444	Barnsley – Wakefield – Leeds	Arriva

3.3.2 The proposed JSC would therefore be well served by buses with 4 services per hour. Full details are as shown in Appendix C. The frequency of services provided on these routes is likely to be attractive for use by both staff and visitors.

3.4 *Traffic Count Data*

3.4.1 In order to ascertain current traffic and pedestrian movements along Huddersfield Road and at the junction with Churchfield Lane a fully classified turning count was undertaken on the 13th March 2009 between the hours of 0700 to 1900. The full count data is attached at Appendix D.

3.4.2 Analysis of the count data indicates that the AM and PM peak hour traffic flows for the Huddersfield Road/Churchfield Lane junction occur between 0815 - 0915 hours and 1630 - 1730

hours respectively. For Barnsley Road in the AM peak, there were 780 two way vehicle movements, for Churchfield Lane there were 487 two way vehicle movements, for Church Street there were 619 two way vehicle movements and for Huddersfield Road there were 692 two way vehicle movements.

For Barnsley Road in the PM peak, there were 656 two way vehicle movements, for Churchfield Lane there were 495 two way vehicle movements, for Church Street there were 435 two way vehicle movements and for Huddersfield Road there were 688 two way vehicle movements. The AM and PM peak hour traffic flows are as shown on Figures 2 and 3.

- 3.4.3 For the existing site access serving the Council offices in the AM peak there were 12 two way vehicle movements and in the PM peak there were 6 two way vehicle movements.

4.0 Proposed Operations and Traffic Impact

4.1 The Proposed Operations

4.1.1 The proposed operations schedule between the hours of 0800 and 1900 is as shown below in Table 4.1. Appointments are scheduled over a 4 hour period in the AM and PM sessions.

Table 4.1

	Mon am/pm	Tue am/pm	Wed am/pm	Thursday am/pm	Fri am/pm
District Nurse	5S	5S	5S	5S	5S
Social Services	3S 10P 2C	3S 10P 2C	3S 10P 2C	3S 10P 2C	3S 10P 2C
Children's Centre	5S 25P/C	5S 25P/C	5S 25P/C	5S 25P/C	5S 25P/C
Barnsley Connect	3S 15V	3S 15V	3S 15V	3S 15V	3S 15V
S = Staff P = Patient C = Carer /Relative V = Visitor					

4.1.2 The new facility will regenerate the locality and consultations are underway with the users from the Darton area to identify the types of services they would wish to see from the new centre and how the centre could be utilised within the community.

4.2 *Generated Traffic and Access Design*

4.2.1 On the basis of the activity schedule shown in Table 4.1 the number of visits per day can be calculated as follows:-

Social services carrying out 20 consultations over 8 hour period = 20 patient appointments per day.

Children's Centre carrying out 50 consultations in total over 8 hour period = 50 patient appointments per day.

Barnsley Connect carrying out 30 consultations in total over 8 hour period = 30 patient appointments per day.

Total visits per day = 100 which equates to an average of 13 per hour excluding staff.

4.2.2 It is proposed to provide improvements to the Huddersfield Main Road/Huddersfield Road stub as shown on MJMC Drawing 4671/SK02 to mitigate the impact of relocating the site access from Churchfield Lane.

4.2.3 Pedestrian access from Churchfield Lane will be via the existing footway along Churchfield Lane and Huddersfield Road, directional signage for pedestrians will also be provided at appropriate locations to be agreed with the Highway Authority.

4.3 *Car Park Demand*

4.3.1 Based on the proposed operations schedule set out in Para 4.1.1 above an assessment of the demand for the visitor's car park has been undertaken and the results of this assessment are as shown in Figure 4.

4.3.2 The following assumptions were made in the assessment of the demand for the visitor's car park:-

- All visitors arrive by car
- All visitors arrive 5 minutes early for appointments
- AM and PM sessions are 4 hours duration
- Duration of stay averages between 20 to 30 minutes
- Minimum predictions assume no delays
- Maximum predictions assume slight delays in appointment system

4.3.3 Based on the worst case assumptions above the analysis indicates that a demand of 10 spaces will be required, hence it is concluded that the parking provision of 30 spaces is justified. Additionally, whilst it is expected that a percentage of trips will be by other modes of transport this will be subject to both seasonal and daily variations.

4.3.4 Further assessment of the maximum parking standards using the guidance in SPD32 part of the Barnsley UDP document results in a maximum allowance of 59 spaces. The current PPG13 guidance seeks to address these issues by the introduction of Travel Plan Frameworks and in order to meet the Government objectives in that respect the operators of the proposed JSC are endorsing the measures detailed in the Travel Framework Plan for this application.

4.3.5 All of the assessment methods confirm that the proposed parking provision is commensurate with the scale and operations of the proposed JSC.

4.3.6 There is no specific guidance for parking standards at Health Facilities in PPG13.

4.3.7 As part of this development it is proposed to apply to the Highway Authority for a Traffic Regulation Order to be made to control on-street parking in the vicinity of the site and in particular at the junction of Old Huddersfield Road with Huddersfield Road.

4.4 *Cycle Parking Demand and Provision*

4.4.1 A total of 5 secure cycle racks are to be provided, 1 for use by staff and 4 for use by visitors. Staff demand has not yet been established, but staff surveys will be undertaken so that the data can be used in the Travel Plan Framework document.

5.0 Conclusions

- 5.1 The proposals embrace the stated aims of PPG13 in that the JSC is positioned centrally in Darton, thereby reducing the requirement to travel by car for both patients and staff. Additionally this development represents the combining of multiple services which will reduce total distances travelled.
- 5.2 The JSC is well served by public transport with 4 buses per hour on Huddersfield Road which will be attractive to both visitors and staff.
- 5.3 The provision of cycle racks and the central positioning of the proposed JSC will encourage more journeys to be made by bicycle.
- 5.4 The proposed JSC is located centrally to the catchment area and is well linked by surfaced and well lit footways, therefore it is to be expected that the existing high proportion of visits on foot will be maintained.
- 5.5 The worst case scenario assessment demonstrates the car park clearly operates within capacity with a maximum visitor demand of 10 spaces.
- 5.6 The car park design allows for mobile scan units to visit the JSC without compromising the car park capacity.
- 5.7 Assuming the worst case scenario, whereby all visitors to the proposed JSC arrive by car, the traffic movements generated by the proposed JSC equate to 26 two way movements per hour, the existing two way flows on Huddersfield Road average 767 per hour. Therefore the existing two way flows post development would be approximately increased by 1 vehicle per 2 minutes (3.4%). The above figures have not been adjusted to take account of the existing traffic movements into the site. These number 12 two way trips in the AM weekday peak period and 6 in the PM weekday peak period.

- 5.8 The robust car park analysis that assumes all trips to the proposed JSC will be by car indicates that there will be adequate parking for both staff and patients. In practise there will be linked trips, car sharing, journeys on foot and by public transport and taxis. Furthermore, the measures and incentives included in the Travel Plan Framework will further reduce car park demand.
- 5.9 It is considered that the proposals are in accordance with existing and emerging transport related policies and that there is no demonstrable harm to other road users or the highway network.

On this basis there are considered to be no traffic or transport related reasons why the proposals should not be granted planning permission.

Notes: SSH – Saturdays and School Holidays Only, SD - Schooldays Only
A – On schooldays runs via Darton High School.

443 444

Full Timetable

- Barnsley
- Wilthorpe
- Darton
- Haigh
- West Bretton
- Wakefield
- Hunslet
- Leeds

Also serves:
Pinderfields Hospital

Re-issued 22/09/2008

In partnership with:
Arriva Serving Yorkshire

What's changed

This leaflet has been re-issued due to an error in the previous version.

A School Holidays only journey at 0805 from Barnsley was omitted from the timetable.

Single Service Timetables

Full Timetable – Individual leaflets give the full timetable for a service and where appropriate will combine services that complement each other.
