**Re:** Confirmation of Licensable works in respect of bats at the extended barn, Redhouse Farm, Cross Hill, Brierley, Barnsley, South Yorkshire, S72 9LE.

**Reference:** 2021-52549-EPS-MIT

Dear Sirs,

I write to confirm that all mitigation in respect of the above property in relation to bats and their roosts has been completed.

Mitigation in the form of bat boxes is in situ on retained trees with the site boundary. These will be retained in situ for the long term.

A soft destructive search conducted under licence by the named ecologist on the above-named licence recorded no bats in situ. The roost has now been closed under the terms of the licence and no further works are required.

Yours faithfully

Natasha Estrada BSc(hons), MRes, MCIEEM.

Principal Ecologist & Director
