1 Introduction

1.1 Sanderson Associates (Consulting Engineers) Ltd. has been appointed by Keepmoat Homes Ltd. to advise on the traffic and transportation issues surrounding proposals for residential development at School Street, Thurnscoe.

1.2 The application site forms part of a wider residential development which was granted outline planning consent for 900 dwellings in January 2010, under planning ref: 2009/1408. The wider site was separated into three sections, as shown on the plan included at **Appendix A**.

1.3 The area labelled as Site 1 to the south-east of the site, received full planning consent in April 2010, and is now in a state of completion.

1.4 A subsequent Hybrid application (ref: 2017/1051) was submitted in 2017, which sought full planning consent for the erection of 129 dwellings, associated infrastructure and public open space (Phase 2), and outline consent for the erection of 350 dwellings and associated infrastructure (Phase 3). This application received planning approval in March 2018.

1.5 Phase 2 is currently under construction, and as of 11th June 2019, 30 Nº dwellings were occupied out of 129 units.

1.6 The current reserved matters application seeks approval for Phase 3 of the development, albeit, based on a slightly higher development quantum of 357 dwellings (7 additional units to what was considered in the Transport Assessment to support Phase 2 and 3).

1.7 This report has been prepared as an Addendum to our previous Transport Assessment (ref: 10082-001-03), which was submitted in support of the Phase 2/3 Hybrid application.

1.8 For the benefit of this assessment, the site was visited on Wednesday 19th June 2019, in order to observe the prevailing highway conditions and to identify any changes that may have occurred since our previous visit in July 2017.

2 Review of Non-Technical Matters

2.1 Given the passage of time since our previous Transport Assessment (submitted in November 2017), to ensure that our assessment is reflective of current highway conditions, it is considered appropriate to undertake a review of matters which have the potential to impact travel on the local highway network.

2.2 Local Highway Infrastructure

2.2.1 Since our previous visit, there have been no notable changes (outside of the development site) to the local highway infrastructure which would materially affect how people travel on the local highway network.

2.3 Accident History

2.3.1 The previous assessment considered all recorded incidents in proximity to the site that occurred during the five year period between 1st Jan 2012 and 31st Dec 2016. During that study period, a total of twenty accidents were recorded; of which, sixteen were classified as being 'slight' in severity and four were classified as 'serious'.

2.3.2 In order to identify any incidents that have occurred since then, a review of the Crashmap database has been undertaken. It should be noted that the available data includes all incidents recorded prior to 31st Dec 2018. The number and severity of incidents recorded so far in 2019 are currently unknown.

2.3.3 As illustrated in Figure 2/1 (overleaf), the Crashmap database identifies that in the last two year period, there have been four recorded incidents within the approved study area; two 'slight' and two 'serious'.

Figure 2/1 – Crashmap Extract (2017 & 2018)

2.3.4 A summary of the recorded incidents is provided below:

Serious incident ref: 2017140170467 occurred at 3.30PM on Sunday 26th March 2017, along Houghton Road in proximity to the junction with Whyn View. The conditions at the time of the incident are described as dry and fine without high winds. The incident involved a car proceeding normally along the carriageway, not on a bend, colliding with a stationary vehicle parked in the carriageway.

Serious incident ref: 2017140169160 occurred at 4:30PM on Saturday 25th March 2017, at the Houghton Road / Station Road / Shepherd Lane / John Street mini-roundabout junction. The conditions at the time of the incident are described as dry and fine without high winds. The incident involved a collision between the front and offside of two vehicles, respectively, both of which were described as proceeding normally along the carriageway, not on a bend.

Slight incident ref: 2017140239562 occurred at 6:15PM on Monday 30th October 2017, at the Houghton Road / Station Road / Shepherd Lane / John Street mini-roundabout junction. The conditions at the time of the incident are described as dry and fine without high winds, in darkness, however street lights were present and lit. The incident involved a collision between the nearside of a vehicle proceeding normally along the carriageway, not on a bend, and the offside of a vehicle in the act of turning right.

Slight incident ref: 2017140205856 occurred at 1:29AM on Sunday 15th January 2017, at the private drive / entrance along School Street, approximately 90m north of Houghton Road. The conditions at the time of the incident are described as dry and in darkness, however street lights were present and lit. The incident involved a vehicle in the act of turning right, colliding with a parked vehicle.

2.3.5 It is concluded that there are no significant trends associated with the incidents that have occurred since our previous assessment.

2.3.6 Full copies of the Crashmap incident reports are included to the rear of this report at **Appendix B**.

2.4 Accessibility by Sustainable Travel Modes

2.4.1 This issue of accessibility has already been considered by Barnsley Council as part of the site's outline planning approval. The site is considered to be well located to allow pedestrian and cycle access to local services / facilities and various places of education and employment.

2.4.2 With regards to public transport, since our previous assessment, it is understood that the Nº 216 bus service between Wombwell and Grimethorpe has been discontinued, however, given that this service only provided one bus in each direction, per day, the loss of this service is not considered to have a material adverse impact on the accessibility of the site by bus.

2.4.3 Further to the above, there have been some other slight alterations to some service arrival / departure times. The following table provides a summary of the current bus services accessible from the site.

		Approximate Peak Frequencies (Buses per hour)			
Nº	**Route**	**Mon-Fri Day**	**Mon-Fri Evening**	**Saturday**	**Sunday**
219	Barnsley to Doncaster	60 mins	60 mins	60 mins	60 mins
219a	Barnsley to Doncaster	60 mins	No Service	60 mins	No Service
226	Barnsley to Thurnscoe	30 mins	60 mins	30 mins	60 mins
406 (School Service)	Goldthorpe to Thurnscoe	1457	No Service	No Service	No Service
449 (School Service)	Wombwell to Thurnscoe	1504	No Service	No Service	No Service
665 (School Service)	Wath-upon-Dearne to Thurnscoe	1557	No Service	No Service	No Service
668	Thurnscoe to Wath-upon-Dearne	0831	No Service	No Service	No Service

Table 2/1 – Summary of existing bus services

2.4.4 In conclusion, the site remains to be accessible by both bus and rail services.

3 Development Proposals

3.1 The current application comprises a development of 357 dwellings: 7 dwellings more than included in the Transport Assessment prepared to support the site's outline planning consent.

3.2 The site will be accessed via an extension of School Street, at its northern extent.

3.3 The internal layout will be designed to provide loop roads, and servicing will be undertaken directly from these estate roads. Where cul-de-sac are provided, they will be designed to accommodate the swept path of a refuse vehicle, or provide a collection point within an appropriate carry distance.

3.4 Car parking will be provided in accordance with the maximum standards for residential developments set out within Barnsley Council's Supplementary Planning Document on car parking (Adopted March 2012), a summary of which is provided below;

- Dwellings with 1-2 bedrooms – 1 space per dwelling
- Dwellings with 3 or more bedrooms - 2 spaces per dwelling.

4 Traffic Impact Assessment

4.1 The following assessment is provided in order to identify the net cumulative impact of the proposed additional 7 dwellings on the operation of the local highway network.

4.2 Using the approved trip rates from our previous Transport Assessment (LPA ref: 2017/1051), the additional 7 dwellings could be expected to generate the following number of vehicle movements during peak periods.

Time Period	Rates		Generations		
	Arr	Dep	Arr	Dep	Two-way
AM (0800-0900)	0.147	0.411	1	3	4
PM (1700-1800)	0.382	0.229	3	2	5

Table 4/1 – Vehicle trip generations – 7 dwellings

4.3 The TRICS data identifies that the development is likely to generate in the order of 4 additional vehicle movements (two-way) in the AM peak period and 5 additional vehicle movements (two-way) in the PM peak period. This equates to around 1 additional movement every 12 – 15 minutes during peak times.

4.4 In reality, once distributed on to the local highway network, this level of traffic generation is unlikely to be perceivable amongst typical daily fluctuations in traffic flow.

4.5 Notwithstanding the above, with the proposed increase of 7 dwellings, the total number of dwellings to be provided over Phases 1, 2 and 3 equals 646 dwellings. This quantum of development remains substantially below the original outline consent (2009/1408) for 900 dwellings.

4.6 Nevertheless, for robustness, the junction capacity assessments undertaken as part of the Phase 2/3 application have been revisited, and updated to reflect the current situation.

5 Junction Capacity Assessments

5.1 Base Traffic Flows

5.1.1 Fully classified peak period traffic counts have been undertaken by Traffic Data Collection Ltd at the following junctions:

- B6411 / Station Rd / Shepherd Ln / John St;
- B6411 Houghton Rd / School St;
- B6411 Houghton Rd / Lorne Rd / Merrill Rd;
- Barnsley road / Nicholas Ln / Highgate Ln staggered crossroads, and
- A635 / Barnsley Road roundabout.

5.1.2 The counts were undertaken between 0730-0930hrs and 1500-1800hrs on Tuesday 27th June 2017. A copy of the traffic data is included at **Appendix C**.

5.1.3 Following analysis of the traffic count data, the network peak periods were identified as being 08:00 – 09:00 in the AM, and 17:00 – 18:00 in the PM.

5.2 Committed Development Traffic Flows

5.2.1 In addition to the existing network traffic flows, it is also appropriate to consider any traffic flows which are already committed to be introduced to the local highway network. For the purpose of this assessment, it is considered that only the approved Phase 2/3 development traffic generations are likely to have a material impact.

5.2.2 The peak hour traffic flows associated with the approved 479 dwellings (Phase 2/3) are shown on **Figure 1** at **Appendix D**.

5.2.3 As noted in the original Transport Assessment, the approved traffic generations are considered highly robust as they are based wholly on private housing and do not making any allowance for the affordable housing provision, which would typically generate less traffic, whilst they also make no allowance for the traffic generated by the previous housing accommodated on the site.

5.3 Future Year Assessment

5.3.1 An assessment year of 2024 has been considered, 5 years from the year of application. This is consistent with the Transport Assessment for the Phase 2/3 proposals.

5.3.2 To establish the likely growth of base traffic flows from the 2017 traffic surveys to 2024, growth factors have been calculated utilising Tempro (V.7.2). The calculated growth factors have been refined to be representative of the local area (Barnsley 014), the extent of which is illustrated below:

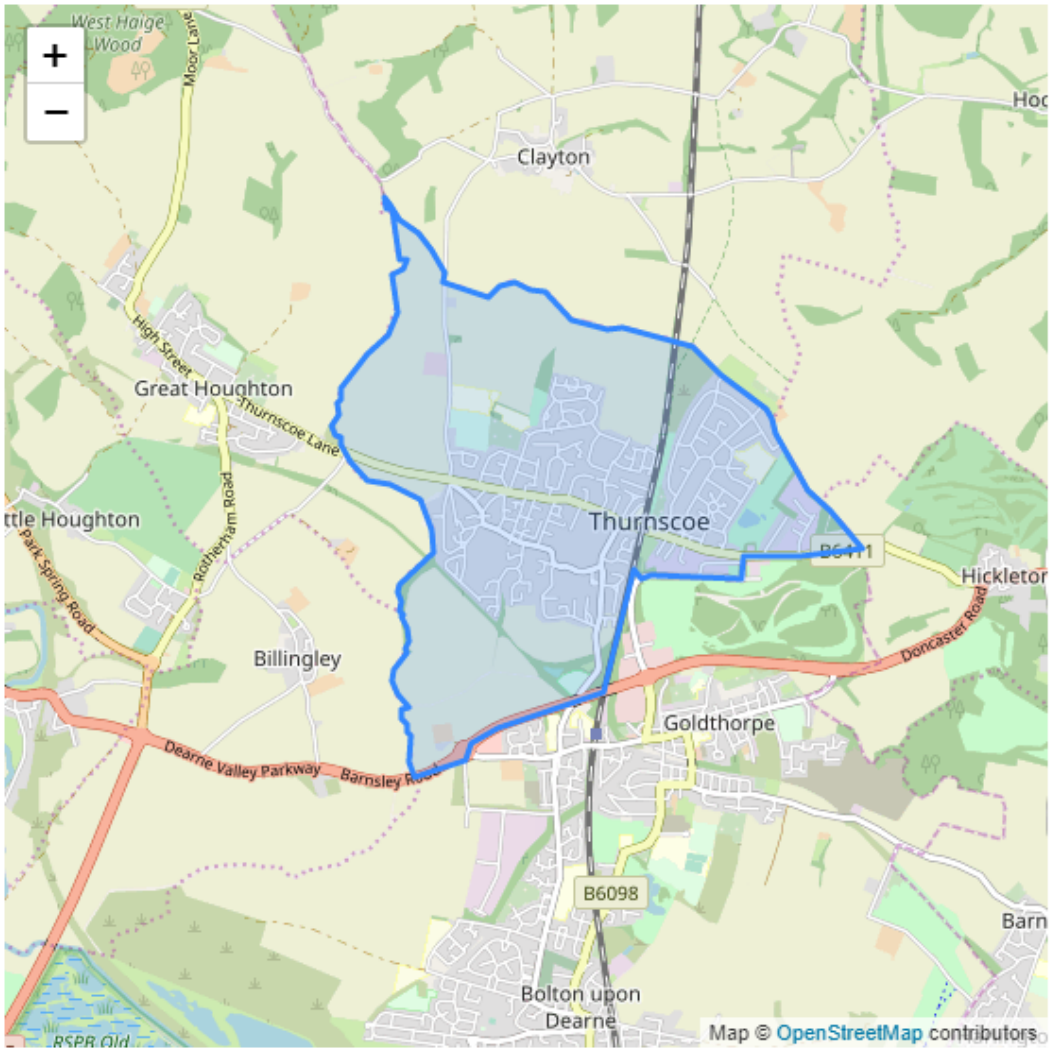

Figure 5/1 – 'Barnsley 014' Middle Super Output Area

5.3.3 As the approved Phase 2/3 development is likely to account for almost all of the residential related traffic growth on the local highway network, 'alternative assumptions' have been applied to the Tempro growth factors so as to avoid the double counting of approved traffic generations.

5.3.4 To achieve this, the forecast number of dwellings has been reduced to the baseline figure, as shown below:

Table 5/2 – Alternative Assumptions extract from Tempro

5.3.5 No alternative assumptions have been applied to the forecast growth in employment.

5.3.6 The resulting peak period growth factors are summarised below, with the resulting 2024 base traffic flows shown on **Figure 2** at **Appendix D**.

AM Peak: 1.0873

PM Peak: 1.0806

5.4 Proposed Development Traffic

5.4.1 The traffic generations associated with the additional 7 units (reiterated below) have been distributed on to the local highway network in line with the distribution principles set out in the approved Phase 2/3 Transport Assessment.

Time Period	Rates		Generations		
	Arr	Dep	Arr	Dep	Two-way
AM (0800-0900)	0.147	0.411	1	3	4
PM (1700-1800)	0.382	0.229	3	2	5

Table 5/1 – Vehicle trip generations – 7 dwellings

5.4.2 The resulting additional development traffic flows are shown on **Figure 3** at **Appendix D**.

5.5 Junction Modelling

Houghton Road / School Street

5.5.1 PICADY has been used to assess the capacity of the junction; the results outputs are included at **Appendix E** and are summarised in the table below;

Arm A = Houghton Road (E)
Arm B = School Street
Arm C = Houghton Road (W)

	AM Peak Hour 0800-0900hrs				PM Peak Hour 1700-1800hrs			
	2024 Base + Committed		2024 Base + Committed + Proposed		2024 Base + Committed		2024 Base + Committed + Proposed	
	RFC	Queue	RFC	Queue	RFC	Queue	RFC	Queue
B – C	0.434	0.76	0.436	0.76	0.215	0.27	0.217	0.28
B - A	0.347	0.52	0.351	0.53	0.276	0.38	0.280	0.38
C – AB	0.175	0.21	0.177	0.21	0.259	0.35	0.261	0.35

Table 5/2 – PICADY Results – Houghton Road / School Street

5.5.2 The assessment shows that the junction would operate comfortably within its practical capacity, with no material queuing on any arm of the junction.

Houghton Road / John Street / Station Road / Shepherd Lane

5.5.3 ARCADY has been used to assess the capacity of the mini-roundabout junction; the result outputs are included at **Appendix F** and are summarised in the table below;

Arm A = John Street
Arm B = Station Road
Arm C = Shepherd Lane
Arm D = Houghton Road

	AM Peak Hour 0800-0900hrs				PM Peak Hour 1700-1800hrs			
	2024 Base + Committed		2024 Base + Committed + Proposed		2024 Base + Committed		2024 Base + Committed + Proposed	
	RFC	Queue	RFC	Queue	RFC	Queue	RFC	Queue
A	0.078	0.1	0.078	0.1	0.023	0.0	0.023	0.0
B	0.407	0.7	0.407	0.7	0.820	4.3	0.822	4.3
C	0.514	1.0	0.516	1.1	0.714	2.4	0.717	2.4
D	0.663	1.9	0.665	1.9	0.515	1.1	0.516	1.1

Table 5/3 – ARCADY Results John St / Station Rd / Shepherd Ln / Houghton Rd

5.5.4 The assessment shows that the junction would operate within its practical capacity, generally accepted as being represented by a ratio of flow to capacity of 0.850 without significant queuing on any arm of the junction.

6 Summary

6.1 Sanderson Associates (Consulting Engineers) Ltd. has been appointed by Keepmoat Homes Ltd. to advise on the traffic and transportation issues surrounding proposals for residential development at School Street, Thurnscoe.

6.2 The application site forms part of a wider residential development which was granted outline planning consent for 900 dwellings in January 2010, under planning ref: 2009/1408.

6.3 The current reserved matters application seeks approval for Phase 3 of the development, albeit, based on a slightly higher development quantum of 357 dwellings (7 additional units to the Phase 3 outline consent for 350 dwellings considered in the Transport Assessment).

6.4 Since the previous assessment undertaken in 2017, there have been no material changes to the local highway network. No apparent accident trends have emerged on the local highway network, and no significant changes have occurred which affect the site's accessibility by sustainable travel modes.

6.5 The site will be designed in accordance with local residential highway design guidance and will provide parking in line with the Council's residential parking standards.

6.6 The impact of the proposed additional 7 dwellings will be negligible and is unlikely to have any discernible impact on the operation or safety of the local highway network. Furthermore, the total number of dwellings to be delivered over all three phases of the wider development (646 dwellings) is significantly below the quantum of development (900 dwellings) which received outline planning approval in 2010.

6.7 Junction capacity assessments have been undertaken at the School Street / Houghton Road priority junction and Houghton Road / John Street / Station Road / Shepherd Lane roundabout junction; both of which are predicted to operate with reserve capacity at a design year of 2024 with committed and proposed development.

6.8 With reference to the National Planning Policy Framework paragraph 109, the cumulative residual impact of the development is not severe and therefore should not be prevented on transport grounds.

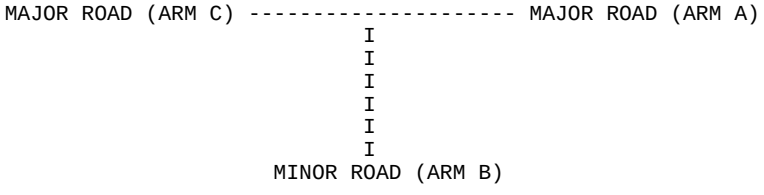
School Street - Houghton Road .vpi"
(drive-on-the-left) at 09:27:46 on Tuesday, 18 June 2019

RUN INFORMATION

RUN TITLE	: School Street - Houghton Road
LOCATION	: School Street, Thurnscoe
DATE	: 25/07/17
CLIENT	: Keepmoat Homes Ltd
ENUMERATOR	: brett.littlewood [PC137]
JOB NUMBER	: 10082
STATUS	: Preliminary
DESCRIPTION	:

MAJOR/MINOR JUNCTION CAPACITY AND DELAY

INPUT DATA



ARM A IS Houghton Road (W)
ARM B IS School Street
ARM C IS Houghton Road (E)

STREAM LABELLING CONVENTION

STREAM A-B CONTAINS TRAFFIC GOING FROM ARM A TO ARM B
STREAM B-AC CONTAINS TRAFFIC GOING FROM ARM B TO ARM A AND TO ARM C
ETC.

GEOMETRIC DATA

DATA ITEM	MINOR ROAD B
TOTAL MAJOR ROAD CARRIAGEWAY WIDTH	(W) 7.70 M.
CENTRAL RESERVE WIDTH	(WCR) 0.00 M.
MAJOR ROAD RIGHT TURN - WIDTH	(WC-B) 2.40 M.
- VISIBILITY	(VC-B)220.00 M.
- BLOCKS TRAFFIC (SPACES)	YES (4)
MINOR ROAD - VISIBILITY TO LEFT	(VB-C) 20.0 M.
- VISIBILITY TO RIGHT	(VB-A) 15.0 M.
- LANE 1 WIDTH	(WB-C) -
- LANE 2 WIDTH	(WB-A) -
WIDTH AT 0 M FROM JUNCTION	7.00 M.
WIDTH AT 5 M FROM JUNCTION	3.65 M.
WIDTH AT 10 M FROM JUNCTION	3.65 M.
WIDTH AT 15 M FROM JUNCTION	3.65 M.
WIDTH AT 20 M FROM JUNCTION	3.65 M.
- LENGTH OF FLARED SECTION	DERIVED: 0 PCU

.SLOPES AND INTERCEPT

(NB:Streams may be combined, in which case capacity will be adjusted)

Intercept For STREAM B-C	Slope For Opposing STREAM A-C	Slope For Opposing STREAM A-B
0.00	0.00	0.00

* Due to the presence of a flare, data is not available

Intercept For STREAM B-A	Slope For Opposing STREAM A-C	Slope For Opposing STREAM A-B	Slope For Opposing STREAM C-A	Slope For Opposing STREAM C-B
0.00	0.00	0.00	0.00	0.00

* Due to the presence of a flare, data is not available

Intercept For STREAM C-B	Slope For Opposing STREAM A-C	Slope For Opposing STREAM A-B
716.63	0.26	0.26

(NB These values do not allow for any site specific corrections)

TRAFFIC DEMAND DATA

ARM	FLOW SCALE(%)
A	100
B	100
C	100

Demand set: 2024 AM Base

TIME PERIOD BEGINS 07.45 AND ENDS 09.15

LENGTH OF TIME PERIOD - 90 MIN.
LENGTH OF TIME SEGMENT - 15 MIN.

DEMAND FLOW PROFILES ARE SYNTHESISED FROM TURNING COUNT DATA

ARM	NUMBER OF MINUTES FROM START WHEN FLOW STARTS TO RISE	TOP OF PEAK IS REACHED	FLOW STOPS FALLING	RATE OF FLOW (VEH/MIN) BEFORE PEAK	AT TOP OF PEAK	AFTER PEAK
ARM A	15.00	45.00	75.00	4.82	7.24	4.82
ARM B	15.00	45.00	75.00	1.73	2.59	1.73
ARM C	15.00	45.00	75.00	3.88	5.81	3.88

Demand set: AM Phase 2 Development

TIME PERIOD BEGINS 07.45 AND ENDS 09.15

LENGTH OF TIME PERIOD - 90 MIN.
LENGTH OF TIME SEGMENT - 15 MIN.

DEMAND FLOW PROFILES ARE SYNTHESISED FROM TURNING COUNT DATA

ARM	NUMBER OF MINUTES FROM START WHEN FLOW STARTS TO RISE	TOP OF PEAK IS REACHED	FLOW STOPS FALLING	RATE OF FLOW (VEH/MIN) BEFORE PEAK	AT TOP OF PEAK	AFTER PEAK

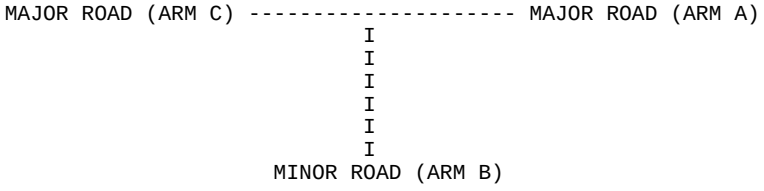
RUN INFORMATION

RUN TITLE	: School Street - Houghton Road
LOCATION	: School Street, Thurnscoe
DATE	: 25/07/17
CLIENT	: Keepmoat Homes Ltd
ENUMERATOR	: brett.littlewood [PC137]
JOB NUMBER	: 10082
STATUS	: Preliminary
DESCRIPTION	:

MAJOR/MINOR JUNCTION CAPACITY AND DELAY

INPUT DATA



ARM A IS Houghton Road (W)
ARM B IS School Street
ARM C IS Houghton Road (E)

STREAM LABELLING CONVENTION

STREAM A-B CONTAINS TRAFFIC GOING FROM ARM A TO ARM B
STREAM B-AC CONTAINS TRAFFIC GOING FROM ARM B TO ARM A AND TO ARM C
ETC.

GEOMETRIC DATA

DATA ITEM	MINOR ROAD B
TOTAL MAJOR ROAD CARRIAGEWAY WIDTH	(W) 7.70 M.
CENTRAL RESERVE WIDTH	(WCR) 0.00 M.
MAJOR ROAD RIGHT TURN - WIDTH	(WC-B) 2.40 M.
- VISIBILITY	(VC-B)220.00 M.
- BLOCKS TRAFFIC (SPACES)	YES (4)
MINOR ROAD - VISIBILITY TO LEFT	(VB-C) 20.0 M.
- VISIBILITY TO RIGHT	(VB-A) 15.0 M.
- LANE 1 WIDTH	(WB-C) -
- LANE 2 WIDTH	(WB-A) -
WIDTH AT 0 M FROM JUNCTION	7.00 M.
WIDTH AT 5 M FROM JUNCTION	3.65 M.
WIDTH AT 10 M FROM JUNCTION	3.65 M.
WIDTH AT 15 M FROM JUNCTION	3.65 M.
WIDTH AT 20 M FROM JUNCTION	3.65 M.
- LENGTH OF FLARED SECTION	DERIVED: 0 PCU

QUEUEING DELAY INFORMATION OVER WHOLE PERIOD

T75

ARM	TOTAL DEMAND (VEH)	TOTAL DEMAND (VEH/H)	* QUEUEING * DELAY * (MIN)	* QUEUEING * DELAY * (MIN/VEH)	* INCLUSIVE QUEUEING * DELAY * (MIN)	* INCLUSIVE QUEUEING * DELAY * (MIN/VEH)
A	13.8	9.2	1.5	0.11	1.5	0.11
B	940.1	626.7	208.0	0.22	208.0	0.22
C	494.1	329.4	122.3	0.25	122.3	0.25
D	646.9	431.3	67.2	0.10	67.2	0.10
ALL	2094.9	1396.6	399.0	0.19	399.1	0.19

* DELAY IS THAT OCCURRING ONLY WITHIN THE TIME PERIOD.
* INCLUSIVE DELAY INCLUDES DELAY SUFFERED BY VEHICLES WHICH ARE STILL QUEUEING AFTER THE END OF THE TIME PERIOD.
* THESE WILL ONLY BE SIGNIFICANTLY DIFFERENT IF THERE IS A LARGE QUEUE REMAINING AT THE END OF THE TIME PERIOD.

END OF JOB
