Subject: RE: Re Constituents enquiry
Attachments: Tree Works Application Form.pdf

Good afternoon Councillor Shepherd,

Apologies for the delay in responding, I am experiencing extremely high levels of enquiries at the moment.

I have looked on my system and it shows eight protected trees (the black dots represent individual tree preservation orders) to the rear of the building as shown in the screenshot below along with one to the front of the property.

The TPO identifies the trees as being Hornbeams and I would assume the trees which are causing an issue for the neighbours are the two which back onto Garden Grove? I hope this information helps identifying the trees which are protected.

With regards to obtaining permission to undertake pruning works then I have attached a copy of the tree works application form for your Constituents information/use. This will need to be accompanied with a sketch plan identifying which trees are to be worked on. I usually advise that when looking to put in an application that a tree owner seeks the advice of a tree surgeon to advise on what works are required and appropriate and to provide a clear and quantified works description; in some instances the tree surgeons will submit the application on the owners behalf.
