

To Whom It May Concern,

Further to the speculation regarding the above applications, I am still extremely concerned about the whole thing going ahead which is down to a number of things,

- 1 Three Storey Dwelling-Living where i do will totally block my view and did not buy my house to be blocked in by bigger dwellings
- 2 Environmental Issues-What impact will this have ?
- 3 Increased air pollution and suffer with asthma already
- 4 Increase in road traffic
- 5 Potential flooding with more dwellings and poor drainage system in area
- 6 Medical Appointments to get worse -already at breaking point now what will it be like with another 1700 homes surely the infrastructure needs looking into as this will have a major impact.

I would like to think that these points will be looked at seriously and not putting profit before people's wellbeing and mental health which at the moment there are lot people starting to worry and having issues about the whole thing.
