LOW CUDWORTH GREEN.

Ref No:- 110814

Date: 22nd August 2011.

1. Introduction.

1.1. Whitcher Wildlife Ltd carried out a survey of the above site in October 2008. Report reference 080925/Rev1 dated 20th October 2008 applies.

1.2. Following a further request, Whitcher Wildlife Ltd has been back to site to determine whether the contents of that report are still relevant.

2. Findings.

Since the original report, the bungalow has been demolished and the old pond has been in-filled. There is no longer a pond on the site.

3. Conclusions.

3.1. The original report assessed the site as being an unlikely great crested newt breeding pond and therefore there was no issue with licensing for the site.

3.2. Now the pond has been filled in there is no potential for breeding great crested newts in the future and there are no further recommendations to be made.

Derek Whitcher.
