29 January 2016

Dear Sir,

With reference to the above planning application.

Has you will see we live next door, and any two storey extension, will have a devastating effect on our lifestyle.

It would deprive us of any natural light and sunlight that we are able to enjoy at present; also it could cause an issue with wind, at present their conservatory causes the wind to swirl. If it was a two storey extension and cause swirling at roof level it will cause damage to our natural slate roof.

As our home will be passed on to our children, could this application have any effect on plans to extend or alter our property?

We have already expressed our concerns to the occupants next door, because any building work will be noisy and extensive and affect our health, as we are both in our late 60's.

So far this has been very stressful and is already affecting our health.

Could you please keep us informed on any planning meeting and information so we can make provisions to attend and voice our concerns.

Yours Faithfully

Mr R. Parkinson
