Your Ref:

For The Attention Of Planning Department

Design and Access Statement
Lo's Pharmacy, Woodland Drive, Barnsley S70 6QN

The application is for permission to mount 3 No. heat pump condenser units to the gable wall of the above property, as outlined on attached drawings, to heat and chill the pharmacy and dispensary.

All systems will have A/A energy ratings and will decrease energy usage considerably from the existing direct electric heating.

The systems are:

PUHZRP71 – SCOP 4.5 SEER 6.7 A+ Heat A++ cooling

MUZSF35 – SCOP 4.4 SEER 7.2 A+ Heat A++ cooling

MUZSF50 – SCOP 4.4 SEER 7.2 A+ Heat A++ cooling

The client – Lo's Pharmacy – have a policy of reducing energy usage and as such have decided to replace the existing direct electric heating systems that are efficient air to air heat pumps, and are recognised by the EU as renewable technology.

Yours faithfully,

L Harrison
