Description of development

The proposed works consist of the formation of an area of concrete hardstanding to an area of unmade ground within the existing service yard at the development site.

An access platform hire company is based on the site, which serves as a depot for the storage of access platforms.

The majority of the existing service yard area is currently provided with concrete hardstanding to its surface, and the proposed works would be to provide a matching concrete surface to the currently unsurfaced section of the service yard.

The area where the hardstanding is to be created is currently used for storage of access platforms and this use will continue following the proposed works.

Access to the site is via an unnamed access road from Wakefield Road.
