

High Hoyland – Photograph from Front of the Proposed Dwelling

This document provides a visual identification of the proposed location of the new dwelling at the site. Below each picture we identify where the proposed dwellings is to be sited. The evidence provided demonstrates that views of the dwelling will be largely screened by existing planting and the proposed new annexe building which is to be sited in front of the dwelling. Details of the location of the proposed annexe in relation to the new dwelling can be found on the enclosed computer generated images.

The existing green house is sited in the location of the proposed annexe

The existing green house is sited in the location of the proposed annexe

The proposed dwelling is sited to the rear of the existing planting/trees located in the centre of the photograph

The existing container is sited in the location of the proposed dwelling

The existing container is sited in the location of the proposed dwelling
