- Change to orientation of picnic area. The new placement of specimen trees will provide shade cover to picnic areas.
- A mix of specimen tree and shrubs are proposed. Due to site constraints 16 trees required moving from their proposed original location and an attempt has been made to situate these elsewhere within the planning boundary, taking in to account the vegetation free zone required for the underground cable route alignment.

Planting to the original proposed layout would have restricted tree growth and tree thinning would be required. The new placement of specimen trees provides sufficient space for the associated canopy to grow in to, resulting in the healthiest possible trees. The original scheme contained 69 specimen trees and the new scheme contains 41. To counteract the loss in numbers, native shrubs have been specified. The total of specimen tree and shrubs in the scheme is 75.
