

Dance Farm Monitoring Plan (29/07/2026)

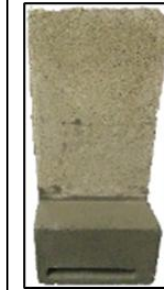

Key

Bat loft

Integrated bat box

Monitoring visits in June/July 2027 & June/July 2031 – to include internal & external inspection of bat loft and external inspection of integrated bat boxes. To be followed by dusk emergence of bat loft, undertaken from two surveyor positions. If a maternity roost is present during June/July survey, then a subsequent emergence survey will be undertaken in August of the same year.

All mitigation features will be inspected. Any damage or defects to installed mitigation will be noted and highlighted to the client to be repaired.
