

Policy Context

Planning decisions should be made in accordance with the Local Plan unless material considerations indicate otherwise. The National Planning Policy Framework (NPPF) does not change the statutory status of the Local Plan as the starting point for decision making. The Local Authority (LPA) has also adopted a series of Supplementary Planning Documents (SPD) and Supplementary Planning Guidance Notes, which are other material considerations.

Local Plan Allocation – Urban Fabric

Planning decisions should be made in accordance with the current development plan policies unless material considerations indicate otherwise and the recently revised NPPF does not change the statutory status of the development plan as the starting point for decision making.

The Barnsley Local Plan (BLP) was adopted at the full Council meeting held 3rd January 2019 after it was found to be sound by the appointed Planning Inspector following the examination process. This means that it now takes on full weight for the decision-making process as the development plan for the Borough, superseding the remaining saved policies from the Unitary Development Plan (adopted in 2000) and the Core Strategy (adopted in 2011). In reference to this application, the following policies are relevant:

Policy SD1: Presumption in favour of Sustainable Development – States that proposals for development will be approved where there will be no significant adverse effect on the living conditions and residential amenity of existing and future residents. Development will be expected to be compatible with neighbouring land and will not significantly prejudice the current or future use of neighbouring land. Policy GD1 below will be applied to all development.

Policy GD1: General Development – States that proposals for development will be approved where there will be no significant adverse effect on the living conditions and residential amenity of existing and future residents. Development will be expected to be compatible with neighbouring land and will not significantly prejudice the current or future use of neighbouring land. Policy GD1 below will be applied to all development.

Policy D1: High quality design and place making – Supersedes Core Strategy Policy CSP 29 and sets out the overarching design principles for the borough. Policy D1 States that development is expected to be of high-quality design and will be expected to respect, take advantage of and reinforce the distinctive, local character and features of Barnsley.

Supplementary Planning Document: House extensions and Other Domestic Alterations

This document establishes the design principles that specifically apply to the consideration of planning applications for house extensions, roof alterations, outbuildings & other domestic alterations. The general principles are that proposals should;

- ***Be of a scale and design which harmonises with the existing building***
- ***Not adversely affect the amenity of neighbouring properties***
- ***Maintain the character of the street scene***
- ***Not interfere with highway safety***

The above principles are to reflect the revised principles in the NPPF, which promote high quality design and a good standard of amenity for all existing and future occupants of land and buildings.

National Planning Policy Framework

The NPPF sets out the Government's planning policies and how these are expected to be applied. The core of this is a presumption in favour of sustainable development. Proposals that align with the Local Plan should be approved unless material considerations indicate otherwise. Where a Local Plan is absent or relevant policies are out-of-date, permission should be granted, unless any adverse impacts of doing so would significantly and demonstrably outweigh the benefits. This is assessed against the policies in the NPPF as a whole; or where specific policies in the NPPF indicate development should be restricted or material considerations indicate otherwise.

In respect of this application, relevant policies include;

Section 12: Achieving well designed places - The Government attaches great importance to the design of the built environment. Good design is a key aspect of sustainable development, creates better places in which to live and work and helps make development acceptable to communities. It is important to plan positively for the inclusion of high-quality design for all developments, including individual buildings, public and private spaces and wider area development schemes.

Within section 12, paragraph 130 is the most relevant which indicates that permission should be refused for development of poor design that fails to enhance the opportunities available for improving the character and quality of an area and its functionality.

Provisions under the 'Town and Country Planning (General Permitted Development) (England) Order 2015'

The Town and Country Planning (General Permitted Development) (England) Order 2015 (GPDO) states that a single-storey extensions, extending beyond the rear of the original house by no more than 4 metres (if a detached house) or 3 meters in any other case and are no more than 4m in height, can be erected without the need to submit a planning application.

No consultees were consulted for this application.

Representations

Neighbour notification letters were sent to surrounding properties, no comments were received.

Assessment

Principle of development

The site falls within urban fabric as such, extensions to a domestic property are acceptable in principle provided that they remain subsidiary to the host dwelling, are of a scale and design which is appropriate to the host dwelling and are not detrimental to the amenity afforded to neighbours. Extensions to residential properties are considered acceptable where they do not have a detrimental impact on the amenity of surrounding residents, visual amenity and highway safety.

Residential Amenity

The SPD states that *"two-storey rear extensions to semi-detached houses should, therefore, generally be designed with a rear projection of less than 3.5 metres"* and that *"two-storey rear extensions will be considered on the basis of the extent of overshadowing, loss of privacy and outlook"*. The main issue to consider, is whether or not the extension would be significantly overbearing on the adjoining neighbour. The proposed extension has a rearward projection of 3 meters, therefore within the limit set put in SPD guidance above.

The proposed extension will not have a significant detrimental impact on any neighbouring property by way of overshadowing or being overbearing. The adjoining property (76 Broomhead Road) has an existing single storey rear extension which has a projection of approximately 3.25 meters, therefore limiting the amount of overshadowing. There will be a slight loss of outlook to one of the rear windows on No.76 however, the extension will not create a sense of enclosure due to is being positioned in line with the side (south east) elevation not the adjoining dwelling. There will be no significant impact of overlooking as no windows are proposed on either side elevation.

Furthermore, the distance to the rear boundary (with 68 Broomhead Road) is approximately 9.5 meters from the proposed rear elevation of 78 Broomhead Road, therefore 0.5 meters short of the advised 10m distance. However, that boundary is to the dwellings rear garden and is not insight of the dwelling (No. 68), henceforth the distance is acceptable and will still retain a significant amount of private amenity space for No.78.

The proposal is considered to be in compliance with Local Plan Policy GD1: General Development and is acceptable in terms of residential amenity.

Visual Amenity

The SPD states that *'materials should normally be of the same type, colour and texture to the existing house or as close a match as possible'*. In this case, the proposed materials will match the existing dwelling with matching brickwork and roof tiles being used. The extension utilises a hipped roof which will carry over the roof line from the existing dwellings hipped roof, with the same eaves height and alignment from the side (south) elevation being used. This alignment harmonises the proposed extension and allows it to be cohesive.

The proposed extension conforms to the SPD in terms of its external materials and roof type and is considered a minor development set to the rear of the property, therefore it will have little impact upon the character of the street scene due to the harmony with the existing dwelling.

The proposed development is therefore not considered to be contrary to Local Plan Policy D1: High Quality Design and Place Making and is considered acceptable in terms of visual amenity.

Highway Safety

There will be no impact upon highway safety.

Recommendation

Approve with conditions

1. The development hereby permitted shall be begun before the expiration of 3 years from the date of this permission.
Reason: In order to comply with the provision of Section 91 of the Town and Country Planning Act 1990.
2. The development hereby approved shall be carried out strictly in accordance with the plans (1002 Dwg. No.1002-102 Rev. A) and specifications as approved unless required by any other conditions in this permission.
Reason: In the interests of the visual amenities of the locality and in accordance with Local Plan Policy D1 High Quality Design and Place Making.
3. The external materials shall match those used in the existing building.
Reason: In the interests of the visual amenities of the locality and in accordance with Local Plan Policy D1 High Quality Design and Place Making.
