

Biodiversity gain plan

Submit a biodiversity gain plan to show how your development will achieve biodiversity net gain.

When to use this form

A biodiversity gain plan shows how a development will achieve 10% biodiversity net gain (BNG). Submit this form to your local planning authority after they approve your planning application.

Unless your development is exempt, you cannot start the development until the LPA approves your biodiversity gain plan and biodiversity metric calculation tool.

4. Biodiversity net gain strategy

4.1 Is the relevant date for the pre-development biodiversity value the same date as the planning application?

Yes

No

4.2 If no, what earlier date did you agree with the LPA?

n/a

4.3 How have you met the guidance on 'what counts towards your BNG'?

[Find out what you can count towards a development's BNG](#)

The area habitat provide both mitigation for the loss of existing habitats, and enhancement above the existing baseline value.

4.4 How will you avoid or minimise impacts to habitats?

Tell us about the steps you've taken on site, including to avoid or minimise the impact on irreplaceable habitats.

Existing on-site habitats are of low and very low distinctiveness, with only two small individual trees representing habitat of medium distinctiveness scrub habitat being present. All low and medium distinctiveness habitat will be lost to facilitate development; however, suitable replacement will be provided post-development.

4.5 Did you use your local nature recovery strategy to inform the strategic significance of habitats?

This includes other specified strategies if you do not have a local nature recovery strategy.

- Yes
- No

4.6 How will you achieve the target net gain percentage?

- On-site
- Off-site
- Both

4.7 Are any of your on-site enhancements considered ‘significant’?
