

Tree works at 1909, Penistone

Two silver birch to fell, all to be chipped and spread onto path adjacent.

Tree A – not that clear from photo that there is an issue but there is a lot of dead wood in this tree. Easy fell on one and then chop up and chip. Tree is approx. 16-18m tall.

Tree B – by lamp post. Will probably have to climb half way and fell each stem by 50% before returning to ground and felling rest. Tree is approx. 16m tall.
