Claim Reference	2012106921
Prepared for	Covéa Insurance

Claim Details:

Report Date	18 June 2013
Policyholder	Mr Hadfield
Claim address	32 Spencer Street Barnsley South Yorkshire S70 1QX

REASON FOR REVISIT

We have revisited the property to determine the most suitable location for the additional site investigations and to review the schedule of repairs.

DETAILS OF REVISIT

The schedule of repairs has been reviewed and altered slightly in symbility, the ceiling have been affected in the majority of the rooms and they have an artex finish, as such asbestos testing will be required to the ceilings. (A form has been uploaded).

We required additional site investigations to determine the depth of the foundations and to obtain roots from within the bore hole.

Due to the sloping nature of the site, we can obtain the foundation details from the side elevation, at the lower level and undertake a bore hole to the front of the building, to around 5m to obtain the root samples.

RECOMMENDATIONS

- 1) Claims handler to instruct asbestos testing – form uploaded.
- 2) Engineer has instructed additional site investigations.
