

**DESIGN & ACCESS STATEMENT
PROPOSED GLAZED ENTRANCE LOBBY AT THE EXISTING ASDA
SUPERMARKET AT BARNSELEY**

The site is an existing Asda store. Presently the entrance is situated under a standard Asda glazed atrium from the car parking areas.

Due to this arrangement the existing revolving doors are frequently activated by shoppers, which is causing discomfort and inconvenience to staff & customers, shifting air disturbance causing disruption to the internal displays within the entrance area and excessive heat loss.

The proposal is to introduce an external weather lobby under the existing glazed atrium. The existing revolving doors will be removed and replaced with bi parting electric doors preventing the prevailing wind blowing directly into the supermarket.

This has no adverse effect on the existing access and egress arrangements to the store in respect of DDA requirements and ambulant / disabled needs. These proposals do not create any access problems

There are no trees, watercourses, landscaping, wildlife or otherwise that will be affected as a result of these proposals
