

Description of Trees.

T1, T2 & T3 (2 Photos)

Three Silver Birch. These three trees are dead.

T4 (2 Photos)

Mature Beech with division at about 2m.

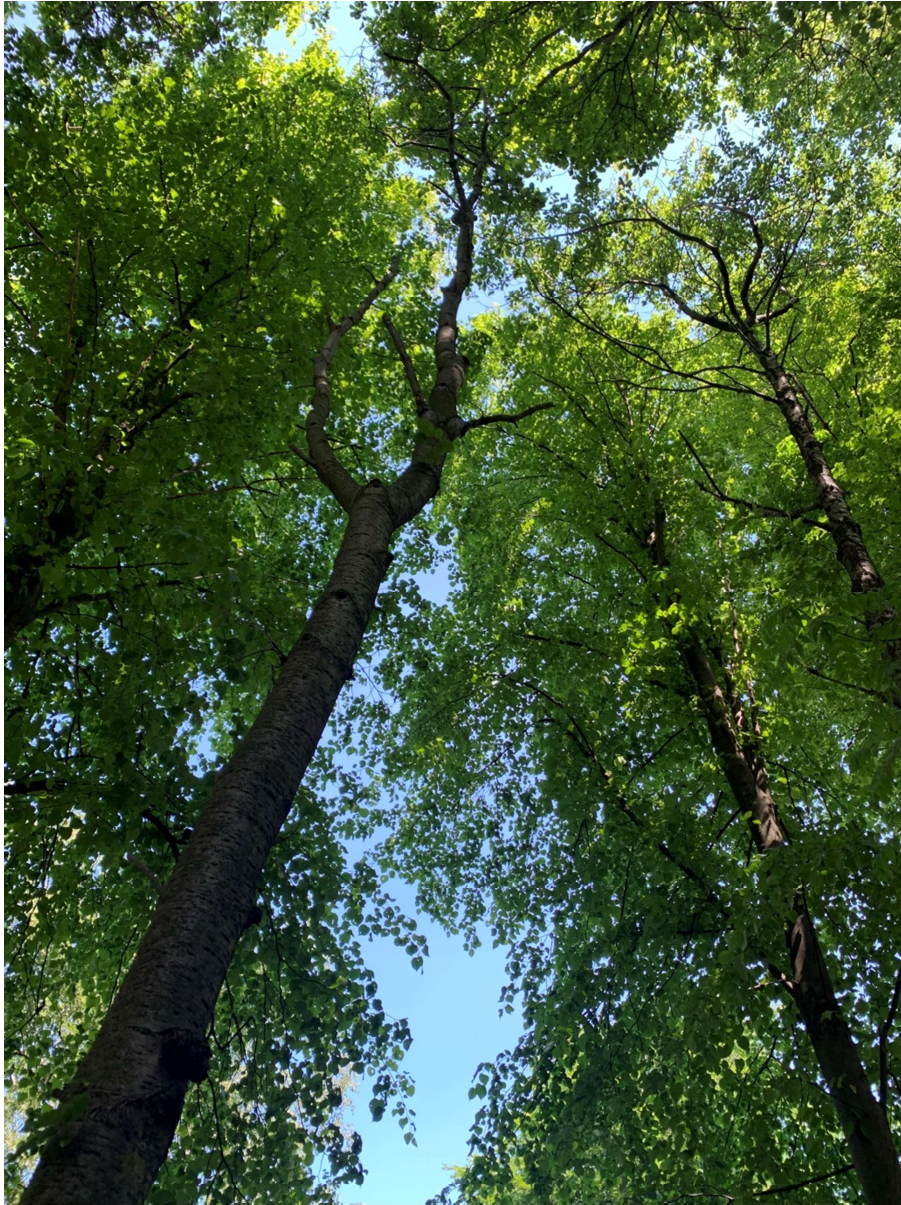

There is rot at the division and substantial damage on the west side (see second photo). The tree has little amenity value.

T5 & T6 (1 Photo of one of the trees)

Two young trees - species not determined. These are very tall trees with only a small amount of canopy at the top. They are overshadowed by other more mature trees around them. Because of their age it is not thought that they are covered by the TPOs

NOTE ON TPOs

Two TPOs cover trees in this area:
TPO 4/1981, and TPO 1/1977.

We are not certain if either extend to this part of the garden.
