The Hut, Wombwell. Supporting Information Revised Nov 14.

Visitor Information

The Business will generate traffic to "The Hut", we have broken down the type of traffic and information below:-

- Staff Car Parking – 2/3 cars maximum which can be double parked in bays to minimise space used. We will encourage staff to use public transport.

- Delivery Traffic – We generally get deliveries 2 or 3 times a week by parcel courier and as such commercial traffic will be less than the existing traffic generated by the industrial nature of the business. Courier vehicles tend to be box vans up to 7.5 tonne. We will also request for deliveries on specific days or times away from peak times.

- Customers – The main traffic will be generated by visitors attending our sewing classes. They will be encouraged to use the nearby public transport links (Train & Bus) and we will stipulate on the class booking form that parking must be in allocated parking spaces within the grounds of the building.

- The proposed Tea room is quite small and will be a supplementary sale to the sewing classes in general and we envisage will not generate much traffic in its own right. The tea room will serve tea/coffee, cakes and simple food such as Panini & Soup. We will not be serving breakfasts & fried foods & take away food etc., as this will be detrimental to the other parts of the business.

Grounds

We have designated 11 customer car parking spaces including 2 disables spaces and 2 staff car parking spaces.
Customers will park within the site walls and not on street.
The spaces will be delimited by suitable markings and the concrete hard standing which is below the existing topsoil and grass which will be removed.
