B. Brown Builders

Method Statement for new build High Croft, Hoyland

Parking of vehicles for site operatives and visitors	Site personnel shall have a designated parking space on the current rear drive that will be highlighted and away from ongoing construction Visitors parking will be next to the operatives parking and the current owner's driveway will be used as an overspill car park if needed. No parking will be necessary on High Croft
Access for construction traffic	Access for all site traffic will be via High Croft to the rear of the existing property all deliveries will be backed on site via a banksman
Loading and unloading of plant and materials	All materials will be unloaded on site via machine if necessary (large/heavy) Small items will be unloaded by hand following the proper manual handling techniques All plant will be unloaded/loaded via ramps provided by the plant owner
Storage of plant and materials	All plant/small materials will be kept in the current owner's garage A designated area will be cornered off for all large materials and a container will be obtained if necessary for larger items Most materials will be ordered and used in the same day if manageable to reduce space needed for storage
Wheel washing	Wheel washing facilities will be accessible prior to exit at the end of the driveway
Control of dust and dirt	All cutting/drilling dust and dirt will be reduced by using a water attachment for the tool which will be drilling/cutting and to dampen the area at the cutting station Boot washing facilities will be available on exit to reduce the dirt from site to street Temporary hard-core access driveway to be installed to reduce ground sludging for access to all operative/plant
Control of noise	No works shall take place before 8am or after 6pm, before 9am on Saturdays or at all on Sundays.
