

Product Data Sheet

HP14 Base Limestone White

K Rend HP14 Base is a cement based, polymer modified basecoat. Normally applied in 1 coat as a backing coat for K Rend finishes or as a trowelled finish for other coatings.

K Rend HP14 Base can also be used as an insulation bedding adhesive as part of a fixing system (with appropriate fixings) for polystyrene insulation boards onto masonry substrates.

K Rend HP14 Base requires only the addition of water and 5 minutes mixing time. Incorporation of Alkali Resistant Reinforcing mesh may be required. K Rend HP14 Base is normally applied manually but can also be spray applied.

HP14 Base uses "High Polymer" technology for a cost effective enhanced performance onto a wide variety of substrates. For use on unusual substrates always seek technical advice. It is designed as the ideal background for thin coat synthetic resin plasters such as Silicone TC.

- COVERAGE:**
1.8 kg / mm thick / sq m
- REQUIRE:**
8-11 kg / sq m approx.
nominal 4-6mm thickness
- KITEMARK CLASSIFICATIONS:**
Compressive strength: CS IV
- APPLICATION**
- Mix for at least 5 minutes to break down additives
 - Add 5-6 litres of clean water per 25kg sack
 - Apply by hawk and trowel or by machine
 - Bed in mesh if required
 - If the next coat is to be a K Rend traditional finish, form a light key by scratching as per good render practice
 - Alternatively, float to a flat finish

- As Insulation bedding Adhesive**
- Apply by hawk and trowel to insulation board in a continuous line around the perimeter and additional dabs in the centre: at least 50% of the board should be covered
 - Alternatively apply with a notched trowel over the entire face of the board
 - Press the boards firmly onto the masonry substrate
- Capillary Water Absorption**
Category: W2
- Thermal Conductivity:**
P=50% - 0.46
- In line with our product of continuous product development, we reserve the right to change technical data without notice
