

Risk Assessment: Significant Risks that Cannot be Disposed Out			Suggested Action			
Risk	Level of Risk (RM)					
Deep excavations associated with deep drainage works	High		Ensure all excavations have adequate trench supports and are shored up to prevent collapse			
Handling large diameter manhole and stormwater risers	High		Use correct lifting equipment and trained operators			
Contact with underground workers in confined spaces	Medium		Use gas detectors, wear equipment and ensure operatives wear the correct personal protective equipment			
Noise from machinery	Medium		Operatives to wear the correct ear protection			
Excavations near to utilities	High		Utilities were to be inspected and positions located using appropriate equipment prior to excavation			
Excavations in deep highway	High		Ensure all excavations have adequate trench supports and are shored up to prevent collapse			
It is assumed that those associated with the project will be competent/experienced/trained and competent and have the required level of experience and expertise.						
Ensure the correct shoring/traffic control is used.						

Preliminary

Rev	Details	Date	Drawn	Chk.
E	Root protection zones added and levels amended accordingly	24-4-19	AST	
D	Pallidgarden levels amended, steps from patio removed	28-5-19	AST	
C	Amended following layout change	24-4-19	AST	
B	Trees added	4-4-19	AST	
A	Amended following comments from PC	14-3-19	AST
