**RE: APPLICATION NO: 2010/0192 Honeywell House,
Centre for Sustainable Construction and Renewable Energies**

For the attention of Mr. Keiron Dunn

Dear Sirs,

Following our recent submission of the above numbered planning application and our subsequent recent discussions regarding the same, we enclose for your attention 4 No copies of our revised drawings as listed on the attached drawing register showing minor amendments to the scheme.

The amendments consist of minor changes to the building elevations as highlighted on the accompanying drawings and the inclusion of our landscaping proposals for the development as requested.

We have now received a revised topographical survey of the proposed development site and confirm that the levels shown on the original application are still achievable and remain, therefore, unchanged.

We also enclose as requested our statement addressing Planning Policy EC 10.
