South Yorkshire

Design and Access Statement

We wish to replace our existing 3 section roller shutters at the front of our shop at Pitt Street with a single remote controlled motorised shutter the dimensions of which will be 15 feet (4.5 meters. approx) by 10 feet (3 metres. approx). The dimensions of the box at the top to house the rolled shutter will be 12" x 12" (30 cm X 30 cm) and will eventually accommodate our shop sign which we don't anticipate to be illuminated. The shutter will have eyeball slots in it (see enclosed picture) and we chose dark red as the colour for the finish. This shutter will provided greater security for in the recent past our premises have been attacked five times and on every occasion no-one has been brought to book. If completed our shutter will closely resemble our neighbour's shutter installation at 12, Pitt Street.
