

Additional Information

Date 28/11/2024

See the AWA report, the work to be completed in phases for the Cricket Ground

We the Trust own the ground and all the responsibility for repairs and maintenance

We are developing a full management plan both short term and long term as no work or management done for approx. 30 years

The full plan includes the initial work within the report, this covers Health & Safety issues and land and tree management

When completed stage 2 will be the removal of all "scrub and bramble" growth to provide increased areas for the public use

The removal of self-seeded saplings and thinning out for the strong trees to flourish and where required the removal of infected ash trees

Next stage is repairs to the river bank, as this is the boundary and fencing where applicable for H&S grounds as there are areas of severe bank erosion

Long term to replace and manage the planting of new trees and different varieties

All of this in conjunction with the Cricket Club ie out tenants

David Barron

Treasurer of CRGT
