4. What Are You Applying For?

Based on the type of work proposed and the location and protected status of the trees involved, there are various details and supporting information that will need to be supplied in order for the Local Planning Authority to determine the application.

Are you seeking consent for works to tree(s) subject to a Tree Preservation Order? (•) Yes ( ) No

Do you know the Tree Preservation Order reference number(s) ( ) Yes (•) No

For works to trees covered by a TPO

Please indicate whether the reasons for carrying out the proposed works include any of the following. If so, your application MUST be accompanied by the necessary evidence to support your proposals (see guidance notes for further details).

1. Condition of the tree(s) - e.g. it is diseased or you have fears that it might break or fall ( ) Yes (•) No

2. Alleged damage to property - e.g. subsidence or damage to drains or drives. (•) Yes ( ) No

If Yes, you are required to provide for:

4. What Are You Applying For?

- Subsidence: A report by an engineer or surveyor (to include a description of damage, vegetation, monitoring data, soil, roots and repair proposals) and a report from an arboriculturist to support the tree work proposals.

- Other structural damage (e.g. drains walls and hard surfaces): Written technical evidence from an appropriate expert, including description of damage and possible solutions.

Are you wishing to carry out works to tree(s) in a conservation area? ○ Yes ◉ No

Documents and plans (for any tree)

A sketch plan clearly showing the position of trees listed in the question 'Identification of Tree(s) and Description of Works' MUST be provided when applying for works to trees covered by a Tree Preservation Order. A sketch plan is also advised when notifying the LPA of works to trees in a conservation area (see guidance notes).

It would also be helpful if you provided details of any advice given on site by an LPA officer.

Are you providing additional information in support of your application (e.g. an additional schedule of work for question 'Identification of Tree(s) and Description of Works')? ◉ Yes ○ No

If Yes, please provide the reference numbers of plans, documents, professional reports, photographs etc in support of your application

Site Plan
Engineer's Subsidence Report
Engineer's Addendum Report
Photomontages
Arb Report
Geotechnical Report
Soils Report
Root Report
Level Monitoring Report
Drains Report - repairs completed Oct 2018

5. Identification of Tree(s) and Description of Works

Please identify the tree(s) and provide a full and clear specification of the works you want to carry out.

You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work.

Where trees are protected by a Tree Preservation Order, please number them as shown in the First Schedule to the Tree Preservation Order where this is available. You should use the same numbering on your sketch plan (see help for sketch plan requirements).

Please provide the following information:
- Tree species
- The number used on the sketch plan); and
- A description of the proposed works.

Where trees are protected by a Tree Preservation Order you must also provide:
- Reasons for the work; and where trees are being felled
- Proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.

e.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with one standard ash in same position.

Horse Chestnut (T3 on site plan) - Fell

The tree works are proposed to stop the influence of the tree(s) on the soil below building foundation level and provide long term stability.

Estimated costs of repair to the building are £25,000.00 if the influence of the tree(s) remain and £8,000.00 if the proposed tree works are allowed to proceed. Granting permission will limit these costs. In the event of a refusal we, or our clients, will seek to secure compensation for the additional costs incurred through Section 202(e).

Should the tree/s remain the total cost of repairs will be the Superstructural repairs + Alternative method of repairs = £33,000.00

It is the expert opinion of both the case engineer and arboriculturalist that on the balance of probabilities the supporting information demonstrates the influence of the tree(s).

Note: Further monitoring results may be submitted if these become available during the course of this application.

6. Tree Ownership

Is the applicant the owner of the tree(s)? ○ Yes ◉ No

If No, please provide the address of the owner (if known and if different from the tree location):

7. Authority Employee/Member

With respect to the Authority, is the applicant and/or agent one of the following:
(a) a member of staff
(b) an elected member
(c) related to a member of staff
(d) related to an elected member

It is an important principle of decision-making that the process is open and transparent.

○ Yes ◉ No

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.

Do any of the above statements apply?

8. Trees - Declaration

I/we hereby apply for planning permission/consent as described in this form and the accompanying plans/drawings and additional information. I/we confirm that, to the best of my/our knowledge, any facts stated are true and accurate and any opinions given are the genuine opinions of the person(s) giving them. ☑
