Subject: 14/00216/FUL Installation of 50.2m high anemometer mast, Woolley Edge

For the attention of Tom Shiels

I refer to the above referenced planning application and would comment as follows:

I have assessed this proposal which is for the temporary installation of a 50.2m anemometer mast for a maximum period of 3 years. I consider the following points to be relevant:

- The proposal is for a temporary period only
- The location of the proposed site is approximately 1km from the nearest residential property in Barnsley borough
- Anemometer masts tend to be slim and relatively unobtrusive in the skyline and would not affect the openness of the Green Belt to a significant degree
- There would be relatively few sensitive receptors in the Barnsley area, and on the whole there are significant amounts of vegetation which would screen the anemometer mast from view.

I have carried out consultations and have received the following comments:

Councillor Roy Miller objects due to the possible detrimental aspect to the environment of the people in the area

The Clerk to Woolley Parish Council has commented that the next Parish meeting will not take place until 13th March which is after your deadline of 4th March, and requests that an extension of time is granted.
