3. Description of the Proposal

Please describe the proposed development including any change of use:

The proposed work includes the repairing of an existing, partially collapsed stone retaining wall, and the rebuilding of the collapsed section of retaining wall in the form of a Gabion Wall.
The construction of the new Gabion Wall will involve lowering the height of the partially collapsed stone wall at the toe of the structure, grading slope back to a uniform profile and nailing the new gabions to the graded bank.
The Gabion Wall itself will consist of 9m soil nails, which will then be extended at the front of the existing wall so that the 150mm thick gabion structure can be attached and stone filled. The upper part of the slope will be covered with a growth promoting geogrid and a plastic coated galvanised mesh which can be top soiled.

Has the building, work or change of use already started? ☐ Yes ☒ No
