

**Application by Wayne Hadfield to erect bollards in Quarry Street, Smithies,
Barnsley**

DESIGN AND ACCESS STATEMENT

Design

This is a very simple application to install bollards. The design of the proposed bollard is illustrated by the photograph provided. It is submitted that it is of pleasing appearance to which no reasonable objection may be taken. However, the Applicant would not seek to resist a condition that any other type of bollard preferred by the Local Planning Authority be substituted.

Access

The object of the proposed bollards will be to prevent vehicular access to Wakefield Road from the north-south section of Quarry Street and Od Road. This will enable access to be given, to the main road, to residents of Quarry Street and any other homes to the West of it, in view of their limited numbers. This will significantly enhance their convenience when travelling
