Electricity Act 1989: Overhead Lines (Exemption)(England and Wales) Regulations 2009

It is proposed to undertake the following work that is considered to be exempted from the Electricity Act 1989 by falling within the Overhead Lines (Exemption)(England and Wales) Regulations 2009:

ESQCR - Clearance Issues, Maintenance & ABC Works - S72 8SG

Particulars of proposed development to be completed by Applicant:

Following a recent line patrol it has been highlighted that the existing low voltage distribution network at the above requires maintenance and renewal works to ensure the security of the affected supplies. To rectify this it is proposed to carry out maintenance and re-stringing works to the existing open-wire overhead network to replace the existing conductors with new ABC (Aerial Bundled Conductor). See enclosed plans 140012403 01/02 which detail the required maintenance works along with any sections of existing line to be converted to ABC coloured by a solid green line. See also associated pictures. These works are considered as minor by DECC and therefore fall within the exemption regulations.

The Council/Authority is requested to indicate that it has no objection to the work being carried out by returning two copies of this Form with the Certificate completed and signed.

Yours Faithfully

For and on behalf of the Applicant
