Residential Development – The Flouch, Hazelhead, Sheffield

LANDSCAPING PROPOSALS

A Tree Survey has been prepared to identify all existing trees and hedges at the site. A copy of the survey is included as part of the application documents. None of the trees or hedges on the site need to be removed to facilitate the development. The report recommends the removal of one tree close to the north eastern corner of the site (identified on drawing P1) due to its condition.

A detailed landscaping proposal is currently being prepared by FDA landscapes and will be submitted as part of this application within the next 10 days.

 . Yours sincerely

MJ Booth
