Extended Phase 1 Habitat Survey

Addendum to Report Issued: 20th July 2016

Rotherham Biological Records Centre was consulted, the result of which shows no records of specially protected species at or close to the site. It should be noted however such absence does not necessarily imply a protected species is absent from a given site and should not be interpreted as such. Additionally the search resulted in an absence of designated wildlife sites.

Barnsley Biological Records Centre was also contacted but they concluded that the site was not covered in their geographical range.

Appendix III: Data search included
