

Obviously this is already a done deal, but I wish to raise again the extra construction traffic which will further blight Higham Common Road. We already suffer 44 ton HGVs thundering along at extremely excessive speeds all day and night. My property has suffered damage and cracks due to this nightmare, as well as roof damage from the vibration when they hit the brick section of road outside my house. This is constantly being patched (badly) and is in danger of breaking up completely. The addition of numerous extra heavy construction vehicles is going to make the road break up further. This MUST NOT be permitted!
