1.0 INTRODUCTION

1.1 Background

1.1.1 This document provides the framework of the Residential Travel Plan that will be implemented, monitored and maintained at a site in Low Barugh, Dearne Hall Road, Barnsley, should permission be granted for residential use. The document forms part of a planning application submitted by Commercial Estates Projects Limited (CEP Ltd) and Hallam Land Management for the development proposals. The development proposals are for approximately 150 residential dwellings. A plan showing the location of the site is attached at **Appendix TP1**.

1.1.2 The purpose of this framework Residential Travel Plan is to put forward a specific collection of key targets and measures which can then be developed and implemented, and their effectiveness monitored by the Residential Travel Plan Co-ordinator of the Low Barugh, Dearne Hall Road, Barnsley, development. Implementation of the Residential Travel Plan will commence through construction, marketing and sales to ensure that the key measures are in place from first occupation.

1.1.3 As occupation of the development continues the Residential Travel Plan will be monitored, refined and developed to meet the specific needs of the residents. The Residential Travel Plan will be maintained for the life of the development with formal monitoring continuing for five years after the first full occupation.

1.1.4 The Residential Travel Plan, which will be made available to all residents, forms a mechanism to provide incentives for residents to travel by other modes of travel that have a lesser environmental impact than the car. The important health benefits associated with, in particular, walking and cycling will be emphasised throughout to residents. In order to develop the framework for the Residential Travel Plan the existing base-line situation has been considered, including an examination of the travel patterns of other residents in the area and also of the existing provision of public transport and local facilities.

1.2 Policy

National Policy and Guidance

1.2.1 The National Planning Policy Framework (NPPF) sets out the Government's planning policies for England and how they are expected to be applied. At the heart of the NPPF is a presumption in favour of sustainable development which the document indicates should be seen as a 'golden thread' running through the decision making process.

1.2.2 Within the overarching roles that the planning system ought to play the NPPF indicates that there are a set of core land use planning principles which should underpin the decision making process. Specifically in relation to transport these principles include:

- Actively managing patterns of growth to make the fullest possible use of public transport, walking and cycling, and focussing significant development in locations which are or can be made sustainable.

1.2.3 The NPPF indicates that all developments that generate significant amounts of movement should be supported by a Transport Assessment and the decision making process should take account of whether:

- The opportunities for sustainable transport modes have been taken up depending on the nature and location of the site, to reduce the need for major transport infrastructure;
- Safe and suitable access to the site can be achieved for all people; and
- Improvements can be undertaken within the transport network that cost effectively limit the significant impacts of the development. Development should only be prevented or refused on transport grounds where the residual cumulative impacts of development are severe.

1.2.4 The NPPF indicates that the decision making process should ensure that developments that generate significant movements are located where the need to travel will be minimised and the use of sustainable transport modes can be maximised.

1.2.5 The NPPF further indicates that development should protect and exploit opportunities for the use of sustainable transport modes for the

movement of goods or people. Therefore, developments should be located and designed where practical to, inter alia:

- Give priority to pedestrian and cycle movements, and have access to high quality public transport facilities;
- Create safe and secure layouts which minimise conflicts between traffic and cyclists or pedestrians, avoiding street clutter and where appropriate establishing home zones; and
- Consider the needs of people with disabilities by all modes of transport.

1.2.6 The NPPF indicates that a key tool to facilitate this will be a Travel Plan. All developments which generate significant amounts of movement should be required to provide a Travel Plan.

1.2.7 NPPF indicates that planning policies should aim for a balance of land uses within their area so that people can be encouraged to minimise journey lengths for employment, shopping, leisure, education and other activities.

Travel Planning Guidance

1.2.8 The Department for Transport document 'Making Residential Travel Plans Work: Good Practice Guidelines for New Development', October 2005, provides guidance on producing and developing Travel Plans for new residential development. It sets out that the national sustainability agenda and modernisation of the planning system have reinforced the important and positive role that travel planning, including for residential development, can play in achieving a wide range of national and local objectives. These include:

- Helping to reduce the need to travel and to cut congestion;
- Supporting mixed community and housing objectives, including development location, density, design and parking;
- Supporting social inclusion objectives, particularly through improvement of accessibility to and from new development;
- Providing a mechanism through which ongoing sustainability appraisal and integration can be built into planning and implementation arrangements.

1.2.9 More recently the Department for Transport and Department for Communities and Local Government have produced 'Good Practice Guidelines: Delivering Travel Plans through the Planning Process', April

2009, and this provides comprehensive up-to-date guidance on all aspects of travel planning.

Local Policy

1.2.10 Barnsley Local Development Framework and its Core Strategy adopted in September 2011 includes a number of relevant Core Policies. The first Core Policy 9 includes the following requirement:

> *"A travel plan will normally be required alongside planning applications that are likely to have significant transport implications, alongside a full transport assessment".*

1.2.11 The provision of this Travel Plan Framework will address the Core Policy.

1.2.12 Core Strategy Policy CSP 25 New Development and Sustainable Travel states that

New development will be expected to:

- be located and designed to reduce the need to travel, be accessible to public transport and meet the needs of pedestrians and cyclists
- provide at least the minimum levels of parking for cycles, motorbikes, scooters, mopeds and disabled people, and should not provide more than the maximum number of car-parking spaces set out in a Supplementary Planning Document
- provide a transport statement or assessment in line with the thresholds and guidance set out in Department for Transport 'Guidance on Transport Assessments' as published March 2007, or any subsequent version
- provide a travel plan statement or a travel plan in accordance with the thresholds and guidance set out in Department for Transport 'Good Practice Guidelines: Delivering Travel Plans through the Planning Process' as published April 2009, or any subsequent version. Travel plans will be will be secured through a planning obligation or a Planning Condition.

1.2.13 The Transport Assessment and Framework Travel Plan documents associated with this planning application will address the requirements of this Policy.

2.0 SITE ACCESSIBILITY

2.1 Pedestrian Accessibility

2.1.1 With regard to pedestrian accessibility more specific advice is set out in 'Guidelines for Providing for Journeys on Foot', which was published in 2000 by the Chartered Institution of Highways and Transportation (CIHT). These guidelines note that walking accounts for over a quarter of all journeys and four-fifths of journeys less than one mile (1.6 kilometres).

2.1.2 The guidelines also provide 'ideal' walk distances for various trip types and advise that the 'desirable' walking distance for commuting or walking to and from school is 500 metres, the 'acceptable' walking distance for commuting or walking to and from schools is 1.0 kilometre and the 'preferred maximum' walking distance is 2.0 kilometres.

2.1.3 The advice contained within the CIHT Guidelines in relation to the preferred maximum walking distance is reflected in the Department for Transport, Local Government and the Regions in conjunction with CABE published 'Better places to live: By design – September 2001. This states that:

> *"Having established the site's broad setting in terms of its relationship to a city, town or village centre, a good starting point is to examine the area within 10 minutes' (about 800m) walking distance of the site. This can help to identify the range of facilities which residents may access comfortably on foot, as well as opportunities to reach more distant facilities by public transport."*

2.1.4 A number of employment, education and leisure facilities are present within 800 metres of the site. An accessibility study of the site has been carried out and the plan attached at **Appendix TP2** shows the facilities within the vicinity of the site. The plan is by no means exhaustive and there are a number of other facilities and employment opportunities in close proximity to the site such as the South Yorkshire (Redbrook) Industrial Estate, Claycliffe Business Park, and Dearne Mills.

2.1.5 A plan is also provided at **Appendix TP3** which shows the walking (i.e. via footways/footpaths) 800 metre, 1.6 kilometres and 2.0 kilometres isolines from the site.

2.2 Cycle Accessibility

2.2.1 Cycling has potential to substitute for short car trips, particularly those under 5.0 kilometres and up to 8.0 kilometres, and to form part of a longer journey by public transport.

2.2.2 Areas including Barnsley and its suburbs, as well as the whole of Barugh Green and its amenities (detailed in the earlier section) are within cycling distance of the site, providing opportunities for residents. A plan showing the 5 kilometre and 8 kilometre cycle isolines is attached at **Appendix TP4**.

2.2.3 Darton Train station is approximately 2.0 kilometres cycling distance from the site and Barnsley train station is approximately 4.1 kilometres cycling distance from the site and therefore both are well within the 5 kilometre cycling catchment area.

2.3 Public Transport Accessibility

2.3.1 It is recognised that for public transport to be an attractive alternative mode of transport to the private car it needs to be easily accessible on foot. The CIHT 1999 publication 'Guidelines for Planning for Public Transport in Developments' recommends that residents of major new housing developments should not have to walk more than 400m (¼ mile) to their nearest bus stop.

2.3.2 The nearest existing bus stops to the site are located on both sides of Barnsley Road to the west of the site. The majority of the site is within 400 metres walking distance of these stops via the southern access onto Barnsley Road. There are further bus stops on Claycliffe Road to the south of the site approximately 75 metres away. Attached at **Appendix TP5** is a plan showing existing bus stops and services together with a summary of the local bus services.

2.3.3 The information shows that the bus stops on Barnsley Road are served by bus numbers 93, 93A, 95, 95A, 96, 96A and 97A these combine to provide at least a 15 minute frequency service to and from Barnsley, the principal local destination.

2.3.4 The stops on Claycliffe Road are also served by bus number 97. The 97 has approximately 7 services a day in either direction and runs from Barnsley to Wakefield Bus Station.

2.3.5 The CIHT guidelines identify that there is a significant difference between rail and bus served developments in that people have been found to be willing to walk about twice as far to an office from a station as from a bus stop; up to at least 800m for rail, compared to about 400m for bus.

2.3.6 The nearest railway station to the development site is Darton Railway Station which is located on Station Road some 2.0 kilometres from the site. A further station is located in Barnsley which is approximately 4.1 kilometres from the site. The station has in the order of 40 cycle parking spaces and is within acceptable cycling distance from the site. Both stations are served by the Hallam service between Leeds and Sheffield. Details of the rail services operating from Darton Railway Station are shown on the schedule attached at **Appendix TP6**.

2.4 Consultation

2.4.1 As part of the planning application process the South Yorkshire Passenger Transport Executive were consulted. The responses states that following a Land Use and Transport Integration assessment the site was scored as "Green" and that the site is within 400m of the Barugh Lane bus stops.

2.4.2 In this case, a 'green' classification through the LUTI assessment means that there is no major intervention required, however, SYPTE suggest that softer measures to encourage public transport use are conditioned on the developer.

2.4.3 A PAN 30 assessment has been undertaken. The site scored a 34 and given that a score of 22 or over defines a site is sustainable and has met the requirements of PAN30 it is clear that this site is a sustainable location.

3.0 INITIAL MODAL SPLIT AND TRANSPORT IMPACT

3.1 Prior to any travel surveys being carried out for a development proposal it is accepted practice to examine census data for the immediate area in which the development site is located in order to estimate what the likely modal split will be of the total person trips into and out of the site. The Low Barugh, Dearne Hall Road development will be situated within the Darton (West) ward of Barnsley.

3.2 The National Statistics Census 2011 data for journeys to work for the ward of Darton (West) has been obtained from the Neighbourhood Statistics web-site. This provides a percentage breakdown of the different modes of transport currently used to travel to work from the Darton (West) ward. From the same census data it has also been ascertained that, of the trips by car, 69% of these are single occupancy and 14% multi-occupancy. This has been based on the assumption that each multi-occupancy car carries one passenger. The base-line (without a Travel Plan) percentage modal splits are summarised below in Table 3.1.

Table 3.1: National Statistics Census 2011 Ward Data
Darton (West) Ward Area - Method of Journey to Work

Mode of Transport	% Split
On foot	9
Bicycle	1
Public Transport	7
Car	83
Total	100

3.3 In order to predict the level of vehicular trips that will be made as a result of the residential development prior to any travel planning measures being in place, the TRICS database has been utilised. Full TRICS data is attached at **Appendix BGH17** of the Transport Assessment. Assuming the land-use category Residential – Houses Privately Owned, the average peak hour trip rates and resultant total vehicular trips are shown in Table 3.2 below with the person trips based on the above mode share figures presented in Table 3.3.

Table 3.2: Vehicle Trips

Assessment Period	Trip Rates per dwelling		Generated Vehicle Trips for 150 dwellings		
	Arrivals	Departures	Arrivals	Departures	Total
8:00am – 9:00am	0.164	0.424	25	64	89
5:00pm – 6:00pm	0.410	0.244	62	37	99

3.4 Using the base-line percentage modal split in Table 3.1 and the average vehicular trips in Table 3.2, the morning and evening peak hour trips for each mode have been calculated and are shown in Table 3.3 below.

Table 3.3: AM and PM Peak Hour Modal Split

Mode of Transport	% Split	No of Two-way Trips	
		AM	PM
On foot	9	10	12
Bicycle	1	1	1
Public Transport	7	8	9
Car	83	89	99
Total	100	107	121

3.5 The above modal splits will be used to agree reductions in car usage and achieve targets for alternative modes of transport as part of this Framework Travel Plan document for the development. This information can be compared with travel mode survey information for the proposed development once the site is fully occupied and travel patterns have been established.

4.0 OBJECTIVES AND OVERALL STRATEGY

4.1 One of the main objectives of the Residential Travel Plan for the proposed development at Low Barugh, Dearne Hall Road, Barnsley, is to minimise the number of car-borne trips to and from the site and within the surrounding area particularly during the highway network peak periods and those which involve single occupancy of the vehicle. Another key objective is to promote a healthy lifestyle to all residents which can be assisted by making more journeys on foot or by cycle. Even the use of public transport will usually result in greater distances being covered on foot (or by cycle) both at the origin of the journey and at the destination.

4.2 In order to assist in achieving its overall objectives the Residential Travel Plan in conjunction with the design for the development shall therefore endeavour to ensure that:

- The development is laid out in such a way that it can be adequately served by public transport and that its layout puts the needs of pedestrians and cyclists at the forefront;
- Adequate facilities are provided on site prior to first occupation to encourage residents and visitors to use alternative modes of travel to the private car;
- All potential new residents, at the marketing and sales stage, are provided with sufficient information and advice to allow them to make reasoned choices with regard to sustainable travel both in visiting the site for viewing and upon taking up residence; and
- Regular survey and monitoring takes place to ensure that measures continually evolve to suit the needs of the residents at the time.

4.3 In order to ensure that these main objectives are achieved a Travel Plan Co-ordinator will be appointed directly following the grant of outline planning permission. The terms of the appointment will be agreed with the Local Planning Authority via a Condition of the planning permission for the development. In the meantime, the role of the Travel Plan Co-ordinator will be carried out by Bryan G Hall Ltd.

4.4 The intention is that a Steering Group will be set up comprising representatives of BMBC, SYPTE and bus operators. The Steering Group will be chaired by the Travel Plan Co-ordinator and will be set up following the grant of reserved matters planning permission. This group will meet at least once per year, one month

following the annual monitoring of the Travel Plan. Other organisations or individuals may be invited to join the Steering Group, such as, during the design and construction stages, a member of the master planning team. Following first occupation, the Travel Plan Co-ordinator will seek to include representation from residents on to the Steering Group.

4.5 At this meeting, the Travel Plan Co-ordinator will present the results of the annual survey and identify whether the Travel Plan is meeting its targets. The action plan of Travel Plan measures for the following year should be agreed including any remedial measures should the Travel Plan be failing to meet any of its targets.

5.0 MARKETING AND COMMUNICATION STRATEGY

5.1 General

5.1.1 If the Residential Travel Plan is to be effective, it is vital that all individuals have easy access to a range of information which allows them to make an informed decision on the way they travel. They must also be made fully aware as to why the Residential Travel Plan has been developed and in particular the health benefits that can be derived from adopting its principles. This is particularly important in respect of residential travel planning where the destinations are much more diverse and therefore the most effective means of influencing travel behaviour is through proactive promotion and encouragement of existing opportunities.

5.2 Residential Sales

5.2.1 Sales staff will advise residents of the travel arrangements and the access options serving the site from the outset, as part of the normal sales and marketing process for the new development. Good access by public transport, attractive walking and cycling facilities and measures to reduce the adverse effects of traffic will be highlighted as positive features to potential residents.

5.2.2 Information on the various travel options available to the site and the benefits of the Residential Travel Plan will be marketed through various communication channels by each residential developer, as set out below:

- Sales brochures including any used by other estate agents; and
- Sales office.

5.3 Setting up a Residents Group

5.3.1 The Residential Travel Plan Co-ordinator will, during the initial home visits, canvass support for the formation of a Residents' Group. Assuming sufficient interest is shown, the Residential Travel Plan Co-ordinator will then set up a Residents' Group and co-ordinate its meetings. The Residents' Group will then provide a forum through which the Residential Travel Plan Co-ordinator can pass on information relating to sustainable transport.

5.3.2 If a successful Residents' Group can be formed and sustained, this could then become the vehicle for continued travel planning at the

development when the formal role of Residential Travel Plan Co-ordinator comes to an end, 5 years after full occupation of the development.

5.4 Ongoing Promotional and Marketing Activities

5.4.1 In addition to the initial promotion of sustainable travel options as individuals first occupy the site, other initiatives will be used to promote sustainable travel as the development progresses on an ongoing basis. These initiatives will include the following:

- Community travel events, for example cycle promotion days, establishment of a Bicycle User Group for the site; special launches for new services etc;
- The distribution of an annual travel newsletter; and
- Updating of travel notice boards

6.0 MEASURES / ACTIONS

6.1 General

6.1.1 The following sections outline the specific measures that may be introduced as part of the Residential Travel Plan. Implementation of the listed measures, which include awareness initiatives and infrastructure provision, is at the core of the Travel Plan proposals.

6.1.2 The Travel Plan measures described will be regularly monitored and reviewed as necessary, (including the distribution of an annual travel to work questionnaire). These measures should not be considered to be fixed, nor are they necessarily an exhaustive list of measures that may be implemented.

6.2 Travel Plan Co-ordination and Management

6.2.1 A key to the success of the Residential Travel Plan will be an effective highly motivated Travel Plan Co-ordinator who will have overall responsibility for the implementation, operation and maintenance of the Residential Travel Plan. The role of the Travel Plan Co-ordinator needs to be fulfilled as the development is planned, constructed, marketed and occupied.

6.2.2 At the present time in order that the details of the framework can be agreed with the Local Planning Authority and key stakeholders, the role of the Travel Plan Co-ordinator is being undertaken by Bryan G Hall Ltd. Following the grant of reserved matters planning consent, a Travel Plan Co-ordinator will be appointed by the developers, the terms of the appointment having been agreed as part of the planning process and the details agreed as part of discharge of relevant Conditions. Any change of Travel Plan Co-ordinator or alterations to the terms of the appointment will be agreed in writing with the Local Planning Authority.

Measure 1 – The developer will designate an appropriate member of staff to act as a Travel Plan Co-ordinator.

6.2.3 The Travel Plan Co-ordinator will liaise with the relevant officers at BMBC and local bus operators who will offer support and advice regarding the

many initiatives for sustainable travel available within the area. BMBC may be able to provide posters, leaflets and timetables for display on notice boards / display units in the sales office and any communal areas.

Measure 2 – Travel Plan Co-ordinator will liaise with the relevant officers at BMBC and local bus operators.

6.2.4 The Residential Travel Plan Co-ordinator will remain in post for 5 years after full occupation of the site. If there is no management company for the development the Residential Travel Plan Co-ordinator will, after the formal role ends, hand over elements of the Residential Travel Plan to any Residents' Group.

6.3 Walking

6.3.1 The Site is accessible on foot to and from the existing local highway network. The Travel Plan Co-ordinator will encourage the residents of the development to walk to various destinations area by providing residents with information and advice concerning safe pedestrian routes to and from the development. This information will be contained within the Travel Information Pack together with information such as walking routes to the bus stops.

Measure 3 – Information packs containing advice and maps showing safe pedestrian routes to and from the site will be provided.

6.3.2 The Travel Plan Co-ordinator will make residents aware of the health benefits associated with walking and consideration will be given to the provision of personal attack alarms and also umbrellas to encourage residents to walk for all or part of their journey. Residents will also be made aware through the Travel Plan of the nationwide on-line walk buddy scheme that is available at www.walkbudi.com. Registration with the scheme is free and the aim is to match individuals who live and work in similar locations in order that they can share the walk to work or educational facilities together.

Measure 4 – The health and financial benefits of walking will be promoted to residents of the site through a variety of means including www.walkbudi.com.

6.4 Cycling

6.4.1 The development is accessible by cycle from the local highway network and dedicated cycle storage will be provided at every dwelling. Cycle storage will be an integral part of the design of each dwelling and if a house has no direct access to the garden (shed) or garage without going through the house, cycle storage will be provided at or near the entrance to the building.

Measure 5 – Secure cycle parking spaces in line with local authority standards will be provided for each dwelling.

6.4.2 Whilst an indicative site layout has been prepared this is subject to change through the planning process. Once the site layout is fixed, the Travel Plan Co-ordinator will prepare a plan showing the available pedestrian and cycle access and routes within the site and to nearby facilities. The plan will also show cycle parking facilities on site for residents and visitors.

Measure 6 – Plans will be produced showing the available pedestrian and cycle access and routes within the site and to nearby facilities.

6.4.3 Residents will be provided with information and advice concerning safe cycle routes to and from the development. A way of encouraging cycling particularly for novices is to organise a series of Breakfast Clubs where new cyclists are introduced to experienced riders in order to gain confidence and useful information. The Travel Plan Co-ordinator will consider the implementation of such meetings to encourage more residents to use this mode of transport on a regular basis. It is acknowledged that this may be difficult to organise within a private

residential development and therefore it is suggested that the information on established cycle groups and clubs be provided to residents within the Travel Information Pack.

Measure 7 – The Travel Plan Coordinator will consider the implementation of a series of Cycle Breakfast Clubs.

6.4.4 The Travel Plan Co-ordinator will also make residents aware of the nationwide on-line bike buddy scheme that is available at www.cyclebudi.com. Again registration with the scheme is free and the aim is to match individuals who live and work in similar locations in order that they can share the walk to work together. This is a sister scheme to the walk buddy scheme.

Measure 8 – The health and financial benefits of cycling will be promoted to employees of the site through a variety of means including www.cyclebudi.com.

6.5 Public Transport

6.5.1 The site is currently well served by existing bus routes with relatively frequent services to Barnsley town centre. Connections to the direct pedestrian routes will be provided between the site and the existing bus stops on Barnsley Road and Claycliffe Road.

6.5.2 The Travel Plan Co-ordinator will positively market and promote the use of train and bus services to all residents in an effort to encourage the use of public transport. The Travel Plan Co-ordinator will ensure that residents are informed and can access all public service information (http://maps.travelsouthyorkshire.com). It is not unreasonable to assume that most new residents will have access to the internet and the Travel Plan Co-ordinator shall ensure that residents are aware of the relevant internet links to access travel information including bus and rail timetables.

Measure 9 – Information packs containing advice and maps showing details of bus services and links to appropriate websites.

6.5.3 To further encourage use of the existing bus services the developer may consider funding the provision of schemes such as a free bus pass per dwelling for one month free bus travel. A voucher may be included within the Travel Information Packs which can be exchanged for the bus pass.

Measure 10 – Site Wide Travel Plan Co-ordinator will investigate schemes such as a free bus pass per dwelling for one month free bus travel

6.6 Car Sharing and Car Clubs

6.6.1 Car sharing represents a relatively convenient form of travel whilst offering significant potential to reduce overall private mileage of residents.

6.6.2 The Travel Plan Co-ordinator may create an informal car sharing scheme at the development. The regular travel needs of residents will be identified through the initial travel survey which will enable the establishment of a database enabling residents having the same destination to be identified, promoting multiple occupancy car journeys.

Measure 11 – The Travel Plan Coordinator will explore the possibilities for creating an appropriate car sharing scheme.

6.6.3 In addition to any on-site based car sharing scheme, the Travel Plan Co-ordinator will inform residents of the web-based Lift Share scheme at www.liftshare.org. This scheme also operates in the same manner as the Cycle and Walk Buddy schemes described earlier. The Travel Plan Co-ordinator will also look into the possibility of setting up a portal on the

Liftshare web-site specifically for the Low Barugh, Dearne Hall Road, Barnsley development.

6.7 Reducing the Need to Travel

6.7.1 Broadband wireless internet provision is now widely available through a standard telephone line and therefore this allows residents to work or study from home and also takes advantage of a wide range of home shopping opportunities for residents. The design of the houses will specifically take account of the requirement to provide a 'home office'.

6.7.2 In order to reduce the need to travel, the Travel Plan Co-ordinator will promote to all residents the advantages that internet use can provide in terms of reducing the number of trips to and from the development particularly during peak periods on the local highway network.

8.0 TARGETS

8.1 In order to determine the impacts of the Travel Plan, challenging but realistic targets must be developed. Prior to any occupation of the development, the actual travel patterns of residents can be estimated from available census data. In line with the information provided in section 3.0 Table 8.1 below uses a target of 5% reduction in single occupancy car use trips to show mode split targets for the development. It should be noted that these are indicative targets and the actual targets will be set in agreement with BMBC prior to first occupation.

Table 8.1: Census 2001 Journey to Work Mode Share Data

Mode	Without Travel Plan	With Travel Plan	Percentage Change
On foot	9%	11%	+2%
Bicycle	1%	2%	+1%
Public Transport	7%	9%	+2%
Car / Taxi	76%	69%	-7%
Car Passenger	7%	9%	+2%

8.2 Once targets have been achieved for several consecutive years, future targets should aim to further reduce the car driver mode share. Further targets, should they be required, will be agreed within steering group meetings.

9.0 MONITORING AND REVIEW

9.1 A programme of monitoring and review will be implemented by the Travel Plan Co-ordinator to generate information by which the success of the Residential Travel Plan can be evaluated. BMBC require that the Residential Travel Plan be monitored against the agreed targets for the level of traffic generation from the development and that the plan is reviewed in light of the findings of each annual survey.

9.2 The Travel Information Pack will contain a travel survey questionnaire to enable the Travel Plan Co-ordinator to obtain an initial picture of travel patterns to and from the development for work, education, shopping and leisure purposes. The Travel Plan Co-ordinator will offer to visit each new resident/groups of residents with the purpose of completing the questionnaire. The Travel Plan Co-ordinator will devise a standard survey form for this purpose and agree its format with BMBC. The survey form is to be agreed at the steering group meeting prior to initial monitoring.

9.3 In addition to this monitoring of travel to work patterns, a fully classified multi modal survey of the site, at each entrance to the site, will be undertaken within the morning and evening peak hours by an independent survey company to record the number of arrivals and the mode of transport used. Both the travel survey questionnaire and the multi modal surveys will be used to monitor the car driver and bus mode share targets outlined in Section 8.0. The car trip generation of the site will be monitored using the registration plate surveys at the site entrances or an otherwise agreed methodology to differentiate between through trips and trips associated with the site.

9.4 The first multi modal survey will be undertaken following the completion of the initial 50 questionnaires or a year after first occupation whichever is sooner. Multi modal surveys will be completed annually at the same time as the travel surveys questionnaires.

9.5 Following completion of the initial 50 questionnaires or a year after first occupation whichever is sooner, and annually thereafter, a summary of the multi modal surveys and responses to the questionnaires will be prepared by the Travel Plan Co-ordinator in an annual monitoring report which will be discussed in the steering group meeting. In addition, if necessary, an action plan of remedial measures will be developed by the Travel Plan Co-ordinator to be implemented (once agreed at the steering group meeting) over the following year. In particular

the annual review will look at how effective the plan is being in meeting the overall targets of modal shift or modal use that have been set.

9.6 Monitoring will involve the regular collection of analytical 'hard' data and 'soft' data in the form of resident feedback. The Travel Plan Co-ordinator will therefore in addition to carrying out annual travel surveys:

(i) Monitor the take up of any site based car-sharing scheme and the already established web-based schemes; and

(ii) Record comments made by residents on the operation of the Residential Travel Plan.

9.7 Information gathered through this more informal monitoring process will be recorded and used through the subsequent annual review process. It will also be available for inspection / review by BMBC.

9.8 Should it be found, through the results of the above surveys, that the agreed target for a reduction in traffic generated by the development as set out in Section 8.0 of this Travel Plan has been satisfactorily met, then this will continue to be monitored on the basis outlined above. Conversely, should the results show that the agreed targets have not been met then the Residential Travel Plan Co-ordinator shall:

- Consider the extent of the non compliance with the agreed targets;
- Consider measures which can be initially implemented, as recommended by residents, which can achieve a relatively rapid modal shift away from private car usage;
- Decide upon what longer term measures are necessary to implement, set a time period for their implementation and review their effectiveness on an agreed basis; and
- Formally advise BMBC on the level of non-compliance with the agreed targets, provide information on the extent of the impact of this and make recommendations to the authorities on measures necessary to achieve the agreed targets.

10.0 ACTION PLAN

10.1 The Residential Travel Plan will contain an Action Plan which will be reviewed annually following the residents travel survey and multi modal traffic counts. The Action Plan will contain an annual programme of measures designed to achieve the targets on travel modal share. It should clearly set out the tasks involved, person responsible and a date by which this will be achieved. The initial goal of the working Residential Travel Plan, during construction and prior to first occupation, is to implement the measures and opportunities for sustainable travel as identified within this initial Residential Travel Plan.

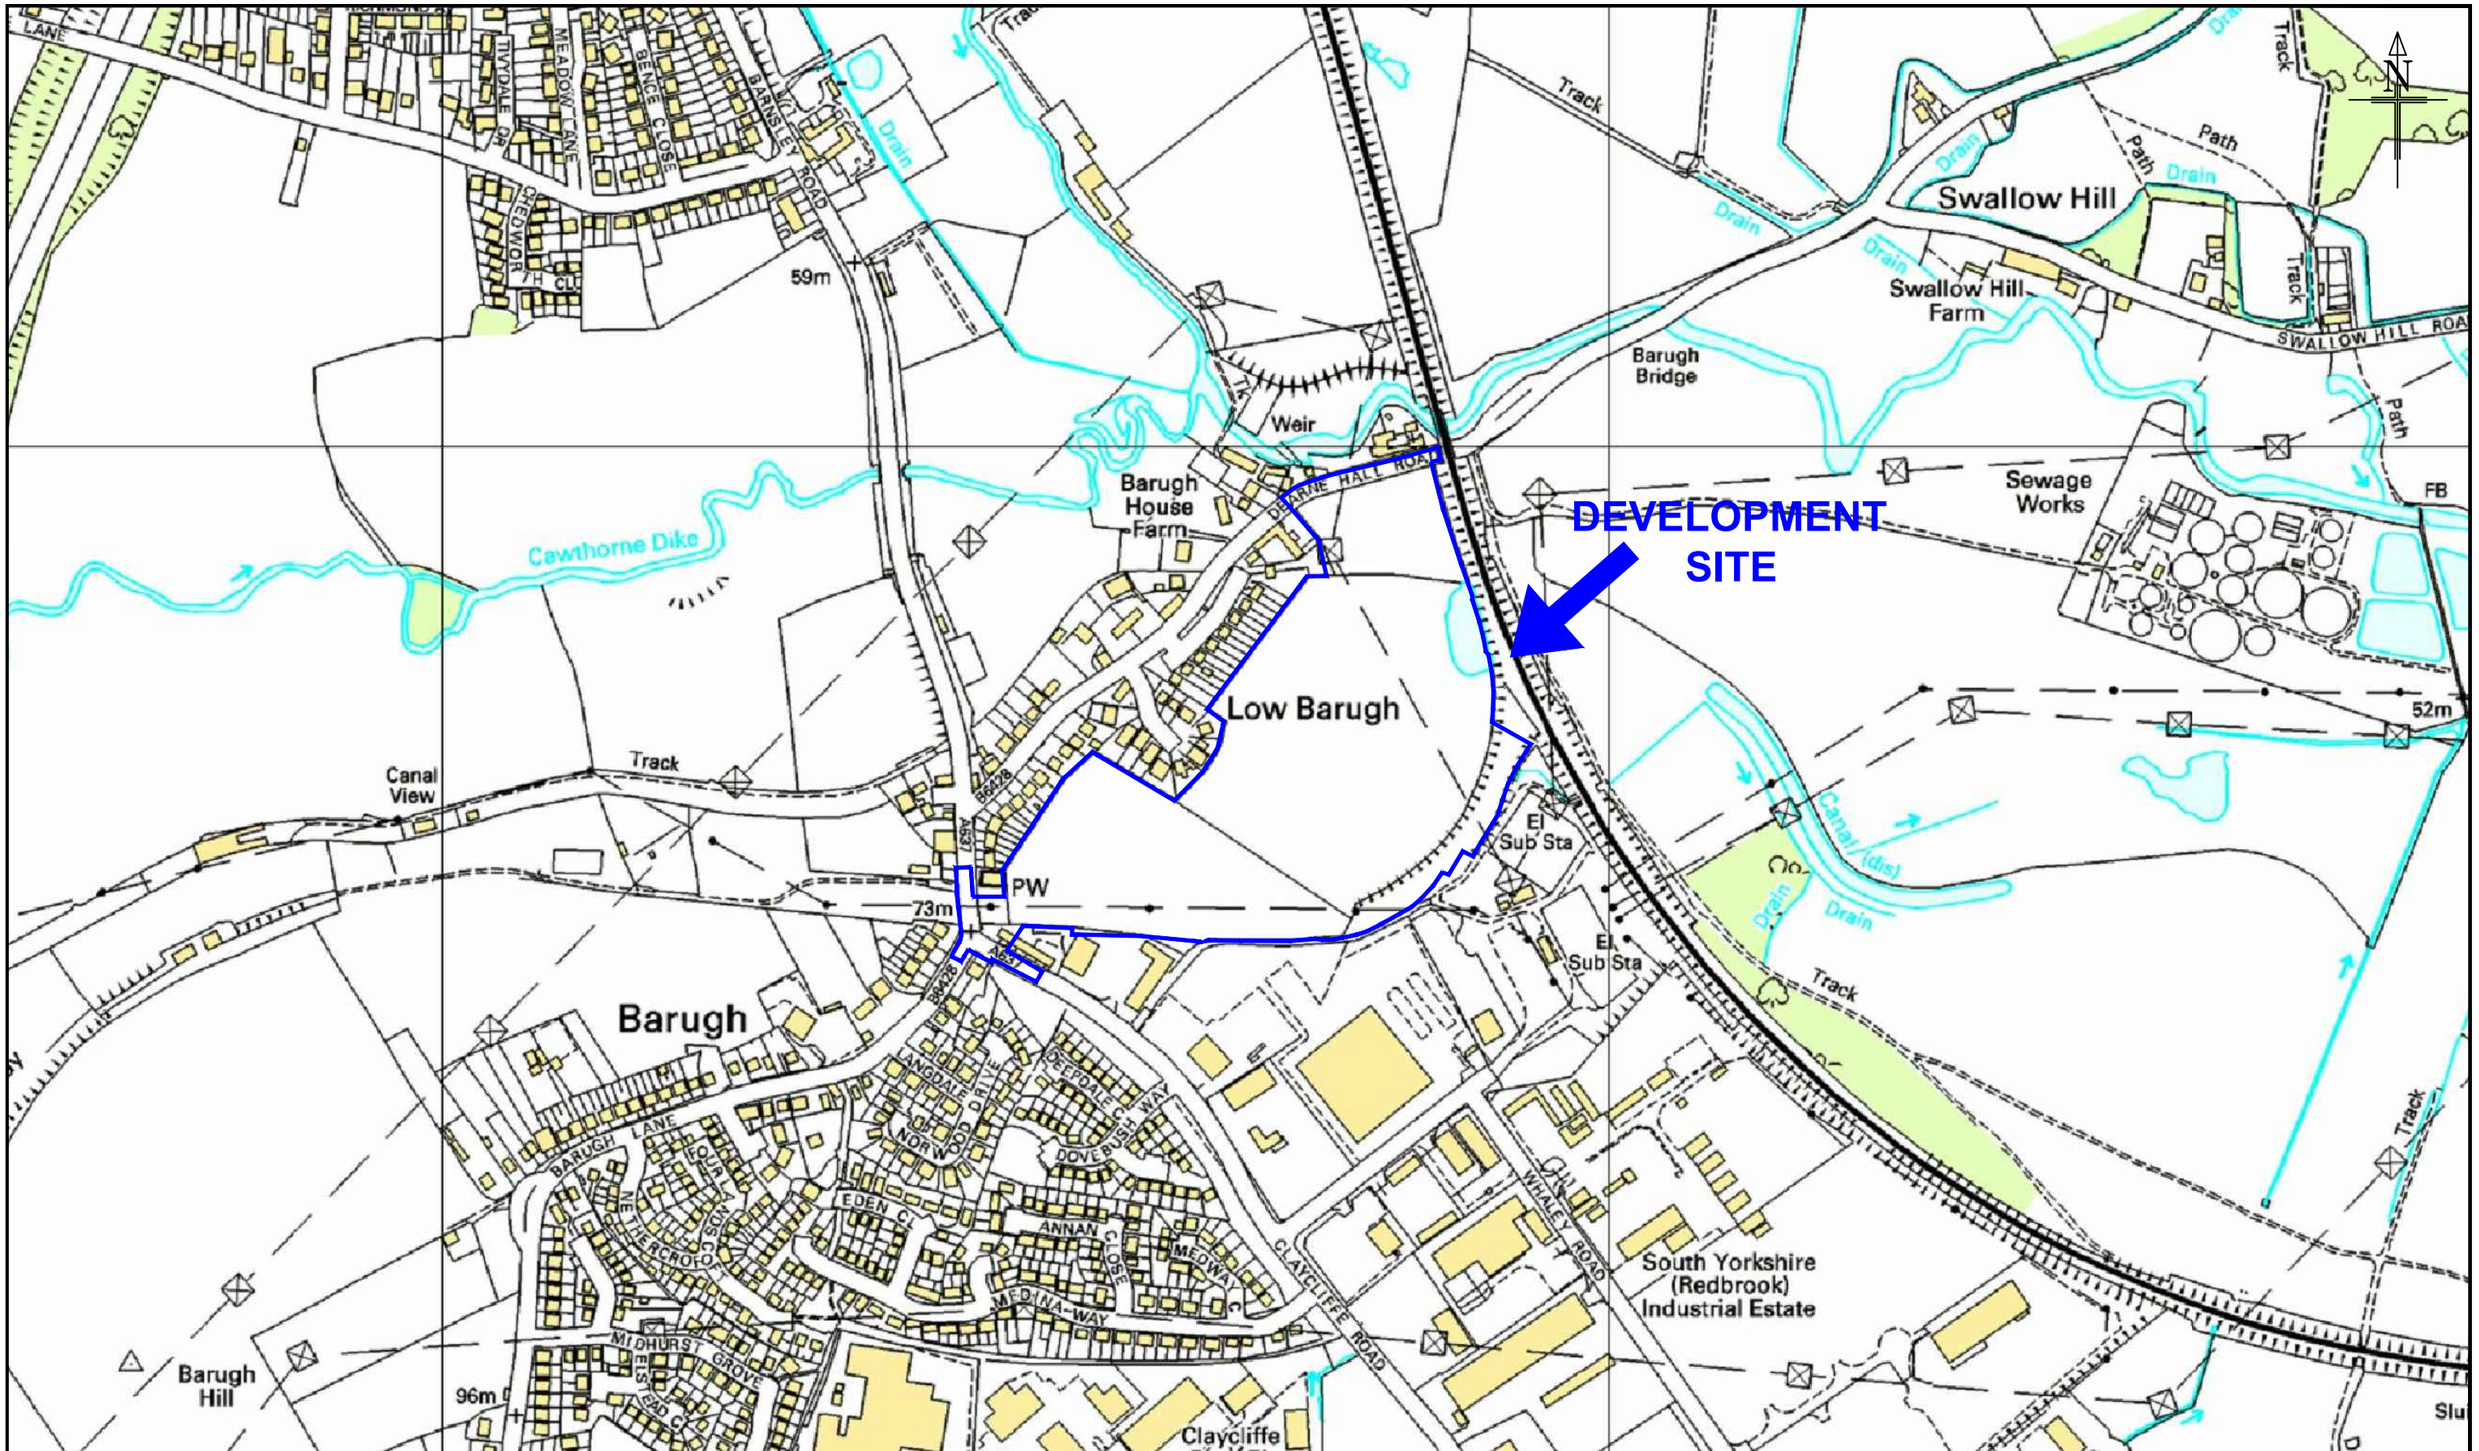

10.2 It will be the responsibility of the Travel Plan Co-ordinator to manage the Action Plan over the periods between annual reviews and ensure that the tasks are being carried out to the agreed programme. At every annual anniversary following first occupation, the Residential Travel Plan must be reviewed in cooperation with relevant officers at BMBC and the annual Action Plan prepared and agreed.

10.3 Below is the initial Action Plan for the end of the first year of occupation. Following the analysis and summarising of the first 50 travel pattern survey questionnaires or one year after first occupation, whichever happens sooner, the Residential Travel Plan and Action Plan will be reviewed and possibly expanded to include particular measures, monitoring and initiatives, which will be agreed with the relevant officers at BMBC.

Initial Action Plan

Action	Date	Responsibility
Appoint Travel Plan Co-ordinator	Following the grant of reserved matters planning permission	Developer
Set up Steering Group	Following appointment of Travel Plan Co-ordinator	Travel Plan Co-ordinator
Display sustainable transport information in Marketing Suite	Prior to opening of Marketing Suite	Travel Plan Co-ordinator
Develop Residential Travel Plan and produce Generic Travel Information Packs	Prior to first occupation	Travel Plan Co-ordinator
Prepare Residents Travel Survey proforma and agree with relevant officers at BMBC	Prior to first occupation	Travel Plan Co-ordinator
Set up Residents Group	Ongoing following first occupation	Travel Plan Co-ordinator
Undertake multi modal surveys at site accesses	One year after first occupation	Travel Plan Co-ordinator
Review Residential Travel Plan and Action Plan in conjunction with relevant officers at BMBC	Following completion of first 50 travel surveys or one year after first occupation whichever is sooner	Travel Plan Co-ordinator

Passenger Information

Tickets
Please note it is a legal requirement to have a valid ticket or pass before you start your journey and you risk prosecution if you travel without one. You must buy your ticket from the ticket office or ticket vending machine before getting on the train. If the ticket office is closed or you board at an unstaffed station you can buy your ticket from the conductor on the train. If you do not use the ticket office or vending machine when they're available, the conductor will charge you the full Anytime single/return fare.

No smoking
Smoking is not permitted on any stations or trains.

Christmas and Bank Holidays
On bank holidays and over the festive period, there will be a difference to the normal operation of some services. There will be no service on Christmas Day and Boxing Day. Please contact Traveline or visit **northernrail.org** for details.

Engineering work
Engineering work can affect services please check **northernrail.org** before travelling.

Train operating companies:

EM - East Midlands Trains
GR - East Coast
HT - First Hull Trains
TP - First TransPennine Express
XC - CrossCountry

All other journeys are operated by Northern.

Please note: train services shown in this booklet are subject to alterations or cancellation at short notice.

Contact Information

Detailed information on all services, facilities and fares can be obtained by telephoning National Rail Enquiries.
