

STATEMENT IN SUPPORT OF PLANNING APPLICATION

Site 33 Barnsley Road, Penistone, Sheffield S36 8AE

Applicant Mrs Kathrine Wood – UK Hygiene

Proposal Change of use from Washroom Hygiene and Sanitary
Waste Transfer Operation
To
Washroom Hygiene and Waste Transfer Operation
Disposing of Sanitary, Nappy, and Aerosols

The statement I made, when the original planning permission was granted and advised by letter dated 23rd September, 2009 still remains in its entirety as the complete facts surrounding this operation, with the exception of one paragraph relating to the aerosol piercing and filtration unit, which we would like to house in our storage area, to eliminate the potential hazardous content of the used aerosols which are part of the service of this organisation.

The contract cleaning business was discontinued in 2006 after the granting of permission on appeal for the use of a building for the storage of cleaning consumables associated with service contracts (January 1998 ref B/97/0544/PÜ) and washroom hygiene services being concentrated, and became the main core business of this organisation.

To recap briefly, this organisation is involved in the servicing of washroom hygiene products, and all the equipment, with the exception of the air fresheners (aerosols) are all non mechanical. All our supplies are transported by our own service personnel, and also maintained by them, using our own company vehicles. All service personnel call into our base at Penistone, once per week, to off load their waste and replenish their stock and pick up paperwork. Since our last application, 2009/0836 (GRANTED) we have reduced the number of vehicles coming in by 4 vehicles. These are going direct with their waste to Astley Manchester, and are picking up their replenishments from Haydock Office (which is purely an administration office)

WASTE TRANSFER STATION

After moving totally into the washroom hygiene services, part of this service involves the provision of sanitary and nappy disposal systems to the customer base.

E.W.C. 18-01-04 and Sharp Boxes E.W.C. 18-01-03. Both types of waste Are separately quarantined – Sanitary and Nappy being disposed of into Virridor Sheffield, virtually every day, and the Sharps being disposed of into SRCL at Leeds. All waste is taken from our premises, on our own vehicle direct to the disposal sites.

As a washroom hygiene organisation, we need now to dispose of the used aerosols, that we provide to our client base, in the form of an Air Freshner, which are serviced on a 60 day cycle. We are advised that when we replenish the Air Freshner with a new can, the old can which could hold some propellants and fragrance, would be classed as hazardous

If we are to be able to disarm these cans to ensure they are safe, and could be disposed of under EWC coding of 15-01-04, and then transport them to Aluminium Recycling, Barnsley for recycling of waste, we would like to propose that we would be allowed to site a small unit (copies enclosed of the proposed unit) enabling this function to take place. There would be no noise attached to this procedure, ensuring no problems to the surrounding area of residential property.

The drainage from the activities within the storage area, is to foul sewer and is the subject of a trade effluent discharge consent.

The vehicles used in connection with this organisation are solely used for the purposes of the washroom hygiene and waste transfer systems. Refuelling of vehicles is off-site, no fuel is stored on site and the site operates on a one way system with entry being taken from Wellhouse Lane and exiting onto Barnsley Road.

We have five parking spaces allocated to us, opposite the office, and these are used for administrative purposes.

A waste management licence was awarded by E.A. and I also hold a COTC, via WAMITAB, qualifying with an NVQ Level 4 Waste Management.

This business operation does not give rise to nuisances, of noise, dust, litter or vibrations and there are no detectable odours.

This site operates between the hours of 8.00am and 5.00pm Monday to Friday Including Bank Holidays.

Apart from the office accommodation, the operations are conducted within the confines of the storage building where a high standard of cleanliness is always maintained.
