To whom it may concern,

20th October 2020

Hoyland Common - Planning condition no. 35

Regarding condition 35, measures to facilitate the provision of Fibre broadband, the development has been registered with Openreach New Sites development team under scheme reference HMS/261.

The duct infrastructure will be directly connected to Openreach' wider network within the public highway enabling connection of Fibre Optic broadband to the estate.

The ducted network will be extended from the estate roads to each plot for future connection.

We would envisage delivery of the new fibre cable network to be 12 months from placement of line installation orders by tenants.

If you require any further information, please feel free to contact me on the above details.
