

Being a founder member of Keep It Green 2014 I don't think it's worth going on about the urban spread, loss of green belt, lack of infrastructure and services that the proposed development will affect, I will leave that to people with more intelligence and patience than me.

I find it very hard not to take it personally. After attending meetings, sitting in the visitors galley at the town hall I had had enough of the arrogance, and in my opinion misguided plans and greed shown by Barnsley Council and the representatives of the developers.

Wearing my nimby hat, of course I don't want a big ugly warehouse with its noise, lights etc. replacing the farming fields our property overlooks.

I have concern for the whole area of Barnsley that will be changed forever by these plans.

The disruption, mess, people and vehicles added to an area that is already stretched to its limits seems senseless to me.
